STANDARD SPECIFICATIONS, 1990 EDITION

SUBSECTION 2107

SODS

Page 1035, subsection 2107.02(a). Delete this paragraph and replace with the following:

Sods shall be cut uniformly and in conformance with the customary practice for the kind of sod being supplied. Badly torn, broken, or dry sod will not be accepted. The sod may contain netting to reinforce the sod; the sod shall be strong enough to hold together when rolled and unrolled three times.

Sods containing noxious weeds or excessive quantities of foreign grass will not be accepted. Sod containing any of the following weeds shall not be acceptable: orchard grass, crabgrass, wire grass (barnyard Bermuda), foxtail, bind weed or yellow nut sedge.

Page 1035, subsection 2107.02. Add the following to this subsection:

(d) Turf Type Tall Fescue.

Turf type tall fescue shall be cut in strips 32 mm thick (±6 mm); strips shall be 500 mm wide and two meters long, or some similar measurement which will equal one square meter. The sod shall contain approximately 60 percent of one or more hybrid varieties of turf type tall fescue and not less than 40 percent (±5%) Kentucky bluegrass.

(e) Perennial Wildflower Sod.

Wildflower sod shall be furnished in pads 500 mm wide and one meter long, or some similar measurement which will equal one half square meter and weighing approximately seven kilograms. The sod pads shall be composed of densely packed, 75 mm tall perennial wild flower plants with well developed root systems. Plants shall be mature enough to bloom within six to eight weeks after planting. The sod shall contain a minimum of eleven varieties of hardy perennial plants, and shall include: Black-Eyed Susan, Purple Coneflower, Dame's Rocket, Gaillardia, Johnny Jump-Up, Shasta Daisy, Rockeress, and Wallflower. No grasses shall be included. Sod pads shall be held together with a net-like fabric to allow handling.

(f) Buffalograss Sod.

Buffalograss sod shall be cut in strips 32 mm thick (±6 mm); strips shall be 500 mm wide and two meters long, or some similar measurement which will equal one square meter. The sod shall contain 95 percent buffalograss.
