Field survey is set for U.S. 160 bridge replacement in Harper County

A field survey for a proposed bridge replacement on U.S. 160 in Harper County is expected to begin around Monday, Nov. 14.

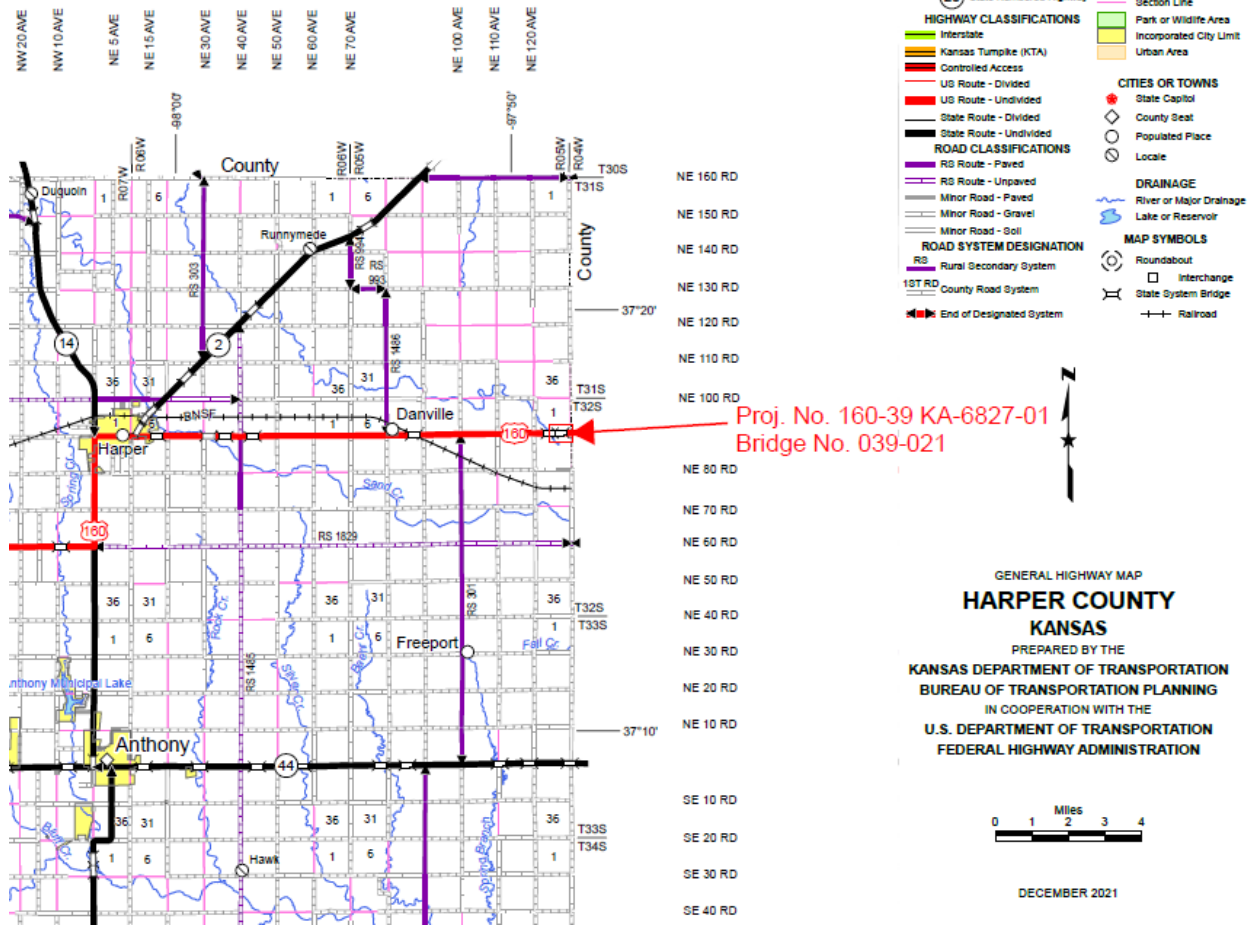

The survey is for the proposed replacement of the Chikaskia River bridge about a half mile west of the Harper/Sumner County line. The approximate length of the survey is 4,100 feet. The survey is based on the existing alignment.

This survey, needed for the detailed design of the proposed improvement, is estimated to be completed by Jan. 15, 2023.

A member of the survey crew first will contact property owners and/or tenants for permission to enter private property. Survey activities will include the use of survey instruments on the ground to determine locations of existing features within the survey corridor.

Roger Dill, P.S., Project Manager, RIC., will be in charge of this survey for the Kansas Department of Transportation.

The map below points to the project location.
