U.S. 166 bridge survey begins this week

The Kansas Department of Transportation (KDOT) has started a field survey for bridge improvements on U.S. 166 in Labette and Cherokee counties. The Labette County survey area includes four locations from the Montgomery/Labette county line east to Ness Road. The Cherokee County survey area includes three locations from SW 107th Terrace east to SW 10th Street (see maps).

Surveyors will gather information necessary for detailed designs of proposed bridge improvements. The approximate length of the survey is 3,500 feet. The survey is based on the existing highway alignment and is expected to be finished by June 1.

Activities include the use of survey instruments on the ground to determine locations of existing features within the corridor. A member of the survey crew will contact property owners or tenants for permission to enter private property. Travis Biddinger of Trekk will manage the survey for KDOT. Persons with questions may contact KDOT Public Affairs Manager Priscilla Petersen, (620) 902-6433.
