Field survey planned on K-9 bridge in Norton County

The Kansas Department of Transportation plans to begin a field survey for a proposed bridge replacement project along K-9 in Norton County starting the week of April 17.

Crews will be surveying the North Fork Solomon drainage bridge, located approximately 1.5 miles east of the K-173 junction. Activities will include the use of survey instruments on the ground to determine locations of existing features within the survey corridor. KDOT expects work to be complete in mid-July.

A member of the survey crew will contact property owners or tenants for permission to enter private property if access is needed. John Sommers of JEO will oversee the survey for KDOT.

For more information, please contact KDOT public affairs manager Lisa Mussman at 785-874-8107 or lisa.mussman@ks.gov.
