# I-70 Bridge Deck Repair to take place in Dickinson County

The Kansas Department of Transportation begins concrete patching on a westbound bridge on I-70 just east of mile marker 286 in Dickinson County near the city of Chapman, beginning Monday, April 29<sup>th</sup>. The driving lane will be repaired first with traffic using the passing lane followed by work in the passing lane with traffic transferred onto the repaired driving lane. Work will take place Monday thru Friday.

Traffic will be reduced to one lane with a 10' width restriction during working hours and increased to 12' at night. Drivers are also able to access the shoulder with-in the work zone. Plans call for repairs on the driving lane to require two weeks. When these repairs are complete traffic will be switched to the driving lane and the passing lane will be under construction for the next two weeks. All lanes will be open Saturdays and Sundays. Remember to obey all signs when approaching and passing through any work zone.

Plans call for the project to be completed in late May, 2013, weather permitting.

KDOT maintenance forces will be making the repairs.
