

718 - ELASTOMERIC CONCRETE

SECTION 718

ELASTOMERIC CONCRETE

718.1 DESCRIPTION

Construct elastomeric concrete according to the Contract Documents.

718.2 MATERIALS

Provide materials that comply with **DIVISION 1500**.

718.3 CONSTRUCTION REQUIREMENTS

Provide the Engineer with a copy of the product manufacturer's instructions for use of this material.

Mix, transport, place and cure the elastomeric concrete as recommended by the material manufacturer.

Provide a technical representative of the material manufacturer at the jobsite during the initial placement of the elastomeric concrete. The manufacturer's representative shall provide technical expertise regarding the mixing, transporting, placement, and curing of the elastomeric concrete. This requirement may be waived for experienced contractors. Submit request for waving a technical representative, along with a list of successfully completed elastomeric concrete projects, to the Engineer.

718.4 MEASUREMENT AND PAYMENT

The Engineer will not measure the elastomeric concrete separately; it will be subsidiary to other items of the contract.
