

Engineering Internship Program Application

Name: _____ Social Security # _____

Perm. Address: _____ City, State, and Zip: _____

School Address: _____ City, State, and Zip: _____

Email Address: _____

Anticipated Date of Graduation: _____

Positions Available for 2018

Please indicate your 1st, 2nd, and 3rd choice for positions.

Positions Located in Topeka Headquarters & Topeka Districts (Number of Positions Available)

_____ **Transportation Safety and Technology (2)**

Engineering students in Transportation Safety Technology will obtain experience in all four Section of the Bureau (Traffic, Signing, ITS and Safety). They will conduct minor traffic studies and assist with conducting one or more Road Safety Audits (county wide traffic studies) under the direction/supervision or assisting an Engineer. They will also analyze crash data and draw collision diagrams when necessary. The students receive experience in minor permanent signing projects as well as reviewing/designing temporary traffic control plans. The students will also spend some time with the Intelligent Transportation Systems (ITS) Unit learning about the applications of technology on our highway system. The students will attend a wide variety of meetings and field reviews that may require overnight lodging.

_____ **Road Design (1) Topeka (1) Lawrence**

The interns will work in the design squads to help prepare road projects for highway construction. The work may include some or all of the following: operation of a CADD workstation, assisting in developing engineering drawings and notes, checking horizontal and vertical alignments and other geometric elements, preparing spreadsheets, checking/calculating quantities of bid items for construction letting, and general project document management.

_____ **Bridge Design (1) Topeka (1) Lawrence**

The interns will work in the design squads to help prepare bridge projects for highway construction. The work may include some or all of the following: calculating and checking material quantities, detailing bridge plans, checking bridge plans for accuracy (dimensions, etc.), modeling structures in bridge analysis and design software and writing simple software tools using Microsoft applications.

_____ **Transportation Planning (1)**

Transportation planning interns will assist in annual data collection surveys, data review and data preparation. The data provides a record of highway conditions and geometric layout as seen by a driver and is used in place of a windshield survey of a section of highway: it provides a safe alternative to driving the lane, and it provides convenient access for users in the offices or for public presentations. Other data collected is used to verify maps of the state highway system and interchange ramps. Interns may have the opportunity to gain experience working with GIS and database tools.

Field Construction	# of Positions	Job Description
District One		
_____ Olathe	1	Working on a concrete paving project on I-435, signing project on I-35 and US-69, and asphalt paving projects on multiple routes. Position will be assisting with processing and performing tests, taking tickets, monitoring contract item quantities, and other inspection work.
_____ Bonner Springs	1	Assist an engineer/technician with the inspection of materials and construction operations for compliance with plans and specifications.
_____ Wamego	1	Work will be conducted on Bridge Deck Polymer Overlay and Bridge Repair for twin bridges on K-18, in Manhattan over K-113. Position will be assisting with the inspection of contractor's work according to contract documents and specifications, as well as performing tests, monitoring contract item quantities and other inspection work.
_____ Topeka	2	Working on a large asphalt surfacing project on I-470 through Topeka, and asphalt surfacing project on US-75 north of Topeka. Position will be assisting with processing and performing tests, taking tickets, monitoring contract item quantities & spread rates and other inspection work on several asphalt paving projects.
District Two		
_____ Salina	1	Assisting with processing and performing tests, taking tickets, inspection work on concrete and asphalt paving projects, bridge and culvert projects.
_____ Junction City	1	
_____ Marion	1	
_____ Belleville	1	
District Three		
_____ Phillipsburg	1	Assist an engineer/technician with the inspection of materials and construction operations to insure compliance with plans and specifications. This will require some understanding of the plans and specifications
_____ Oakley	1	
_____ Atwood	1	
District Four		
_____ Pittsburg	1	Job duties will be general construction inspection and materials testing on road and bridge projects. Other duties such as performing calculations, design, drafting, reporting, etc., may be assigned depending upon the person's experience and capabilities
_____ Independence	1	
District Five		
_____ Wichita Hillside/ Wichita West	2	Will assist with the inspection of bridge repairs, new bridge construction on I-235, concrete paving, asphalt overlay, major interchange reconstruction of I-235 and US 54 (see website www.235kelloggcentral.com), intelligent transportation system construction, surveying, and or development of contract repairs.
District Six		
_____ Garden City	1	Assist an engineer/technician with the inspection of materials and construction operations for compliance with plans and specifications.
_____ Dodge City	1	
_____ Syracuse	1	
_____ Liberal	1	

**Certification of Enrollment in an ABET Accredited
Engineering Program**

This notice will serve as certification that _____ is currently
(Name of Student)

enrolled in the Engineering Program at

(Name of School)

In the fall 2018 semester, this student will be entering his/her:

____ Sophomore Year ____ Junior Year ____ Senior Year

(Student Signature)

(Date)

(Engineering Dept. Chairman's Signature)

(Date)

***This form must be completed and returned with the Kansas Department of Transportation
Employment Application.***
