## **Projects Administered by KDOT**

## PROJECTS ADMINISTERED BY KDOT

This section provides information about the projects the Kansas Department of Transportation (KDOT) will administer for the period October 1, 2012 through September 30, 2016. These projects are contained within the four appendixes that follow. The appendixes are Appendix A- State Transportation Improvement Program Interim Project Index; Appendix B- State Transportation Improvement Program FFY 2013-2016 Project Index; Appendix C- Summary of State Transportation Improvement Program Appendixes A & B Estimated Obligation; and Appendix D- State Transportation Improvement Program Advance Construction Project Index.

Appendix A is a list of interim FFY 2012 projects with a work phase(s) anticipated to obligate during the preparation and comment period of the new FFY 2013-2016 STIP. The index is in county, then project number order. Appendix B lists all projects with at least one work phase anticipated to obligate within the FFY 2013-2016 STIP. The projects are indexed by county and then project number order. Both appendixes provide general project information including scope, work type, letting type, location description, county, route, length, and letting type. Additionally, project funding information including identification of project work phase(s), work phase(s) year of anticipated obligation, total work phase(s) cost estimate and total project estimated cost is provided. The total estimated project cost includes all work phase(s) even those that are not within the period of the current STIP. For this reason, the individual work phase totals listed in the STIP do not always sum to the total estimated project cost. Furthermore, for work phases anticipated to obligate in the STIP FFY 2013-2016 or for interim projects in FFY 2012, funding sources are identified along with the participation anticipated from each source.

Appendix C provides a summary of total anticipated obligation (federal-including the anticipated obligation totals for projects anticipated to be obligated for AC, state and local) by federal fiscal year and by work phase for the four STIP years FFY 2013-2016 and for the Interim year FFY 2012. However, Appendix C does not include projects within the MPO areas. The summary is strictly for those projects administered by KDOT and listed in Appendixes A & B.

Listed in Appendix D are conversion amounts for all projects designated as advance construction (AC) including projects within MPO boundaries. Projects are arranged by county and project number order. General project information is provided including the route, project description, project work

type, the year(s) of expected conversion, the anticipated conversion amount for each year of conversion and the total anticipated conversion amount for each project. Conversions projected to occur after the four years of the STIP are grouped together in a single column titled "After 2016 Planned Conversion". A sum of total conversions by year for each of the four STIP years and for the Planned Conversion after 2016 is provided. Additionally, a total planned conversion amount that includes all years is provided.

All projects designated with AC are done so with federal approval and have been initiated in advance of federal fund authorization for that specific project. All costs incurred on the project while designated as an AC project are the responsibility of the initiating entity (State/Local/Other). Later, when federal aid apportionment and obligation authority becomes available, the AC funded projects are "converted" to federal funds and reimbursement is requested.

The Project Indexes (Appendixes A & B) and the Advance Construction Project Index, Appendix D, may have overlapping projects. This occurs when a project has an estimated obligation within the STIP period in one work phase and has an expected advance construction conversion in a different work phase, which results in the project appearing in Appendix A and/or B and Appendix D. Likewise, it is possible for a project to appear in Appendix D and not be in Appendix A and/or Appendix B. In

this scenario, all project work phase obligations have occurred in prior years that are no longer being reported on the STIP, while the work phase(s) using advance construction has yet to convert.

The information in Appendixes A, B. C & D is not the same as the information provided in the Estimated Obligations for KDOT, Local, Metro Projects table in the Program Financing section. The information in the Estimated Obligation table includes estimated obligations for projects in MPO areas and the estimated obligations are for federally projected obligations only. The information in Appendixes A, B & C are for only KDOT administered projects –project in MPO areas are not included and the summary of obligations are for all obligations anticipated state, local and federal- not just federal. Additionally, the Appendix C Summary totals for each year include AC projected to obligate. The projected obligation of AC is not included in the Estimated Obligations for KDOT, Local, Metro table. These differences preclude the summing of Appendix C Summary totals by year and Appendix D-Total Anticipated AC conversion by year to arrive at the total federal obligation for a year.

The project indexes include the following project related information (\* indicates the project related information in Appendix D; Appendix A & B provide all items listed except Planned Conversion):

 County\* - identifies county where work occurs

## **HOW TO READ THE STIP PROJECT APPENDIXES A & B**

The project appendixes A & B list projects anticipated to obligate in the State of Kansas during the STIP years. Appendix A is an index of interim projects from the prior federal fiscal year that are projected to obligate during the new STIP's comment period. Appendix B is an index of projects in the current federal fiscal year plus three subsequent federal fiscal years anticipated to have a work phase(s) obligate. Both indexes show all expected obligations- federal, state, local and other. Below is a diagram that identifies the fields provided for the projects listed in the appendixes.
