Bicycle Safety Tips

- It is necessary to follow all traffic signals and signs while using the bicycle. Failure to do so may result in a collision and injury.
- When turning at a stop sign, proceed with caution and check for traffic before proceeding.
- Riding with a group is safer and more enjoyable. However, it is important to ride in a single file formation to ensure that everyone is visible.
- When riding in a group, maintain a safe distance from other riders and avoid making sharp turns or sudden stops.
- When passing on the right, be sure to signal your intention and allow enough space for the rider you are passing.
- When riding on the right, be aware of the surroundings and avoid any obstacles or hazards.
- When riding on the left, make sure to check the traffic behind you before changing lanes.
- When riding on the left, be sure to signal your intention and allow enough space for the driver you are passing.
- When riding on the left, be aware of the surroundings and avoid any obstacles or hazards.

Bicycle Statutes

- The Kansas Department of Transportation is responsible for maintaining the bicycle trails and ensuring their safety.
- All bicycle riders must obey all traffic laws and regulations.
- The Kansas Department of Transportation is responsible for maintaining the bicycle trails and ensuring their safety.
