DISCLAIMER INFORMATION
NEW FEATURES

This edition retains use of images from KDOT’s aviation portal (www.ksaviationportal.ksdot.org), which utilizes Google Earth and Bing Maps; some images may not be current. KDOT is not responsible for the currency of images from Google and Bing.

Runway Data Blocks: Runway updates are featured at certain airports via construction work, or other updates, at the time of directory production. Check with the airport and Notices to Airmen (NOTAMs). Also, some runway projects have required displaced thresholds (DPTs) until amendments to instrument approach procedures are published. Check with the airports and NOTAMs for current information. KDOT is not responsible for NOTAM information, distribution and use, or the status of any airport/airfield project.

A reminder: airports with control towers are noted here as Class E airspace when their towers close. Their operating hours are in local time for convenience.

Updates to AWOS/ASOS listings include new installations at Coldwater, Ottawa and Sublette. Construction was in progress, or scheduled, for new units at Clay Center and Lyons. The units may become active during the period of this directory.
Hello and welcome to Kansas!

It remains my abiding pleasure to have served aviation interests in Kansas as Governor. The rich history, stories and accomplishments of the industry, and the important roles of our 138 public-use airports, are sources of pride appreciated the world over. In this corner of the world we know as home, the Kansas Airport Directory is your guide to aviation’s finest.

As one of the state’s largest employers, aviation generates a total economic impact of almost $21 billion from jobs, business support, and visitor spending. Some economic impact also comes from investments in capital projects. From runway improvements to equipment installations, Kansas airports have now reached the goal of 94% of population coverage for air ambulance capability. This provides direct and enduring benefits, especially for rural Kansans. Airport access also helps facilitate business location or re-location efforts. Aviation’s new horizon of Unmanned Aircraft Systems is expanding from initiatives in Kansas to the rest of the nation: from traffic management for airspace safety to business development, Kansas is helping the new industry find its way.

Airports, public safety, and agricultural aviation for crop protection all compose an aviation system that makes your flying a part of traditions like none other.

Fly Kansas for whatever you need, knowing you are part of the state’s proud role of service, efficiency and enjoyment!

Sincerely,

Sam Brownback
Governor of the State of Kansas
Aviation Director’s Introduction

Welcome to the public-use airports of Kansas! There are 138 facilities available for business and personal interests that have reached a new level for 2018. Airports in 20 locations have benefitted from the Kansas Airport Improvement Program (KAIP) since the last Airport Directory (2016) with pavement upgrades, new markings—sometimes both—and updated equipment for lighting and weather information. Also since the last edition, 14 airports have new instrument approach procedures designed for GPS use, including lower “LPV” minimums that are close to the quality of ILS approaches. You’ll find updates in all printed or electronic charts and databases.

As always, fly safe; and enjoy flying all of Kansas!

Sincerely,

Merrill Atwater
Director of Aviation
