K-177 bridge over El Dorado Lake will be repaired

Repair of a K-177 bridge over El Dorado Lake is expected to begin around April 5.

The Kansas Department of Transportation project involves deck patching and overlay.

During the project, expected to be completed around late-August depending on the weather, traffic on the bridge will be limited to one lane and controlled by traffic signals. Motorists should be prepared to slow down and stop for the signals and should expect some delay.

Dondlinger & Sons Construction Co. Inc., of Wichita, is the primary contractor for the \$733,769 project.

The red dot on the map below marks the approximate project location.
