Culvert work begins today near I-70/Turner Diagonal interchange

Drainage infrastructure repair work in the northwest quadrant of the I-70/Turner Diagonal interchange in Wyandotte County begins today, Monday, Sept. 13, and is scheduled to be completed by late October.

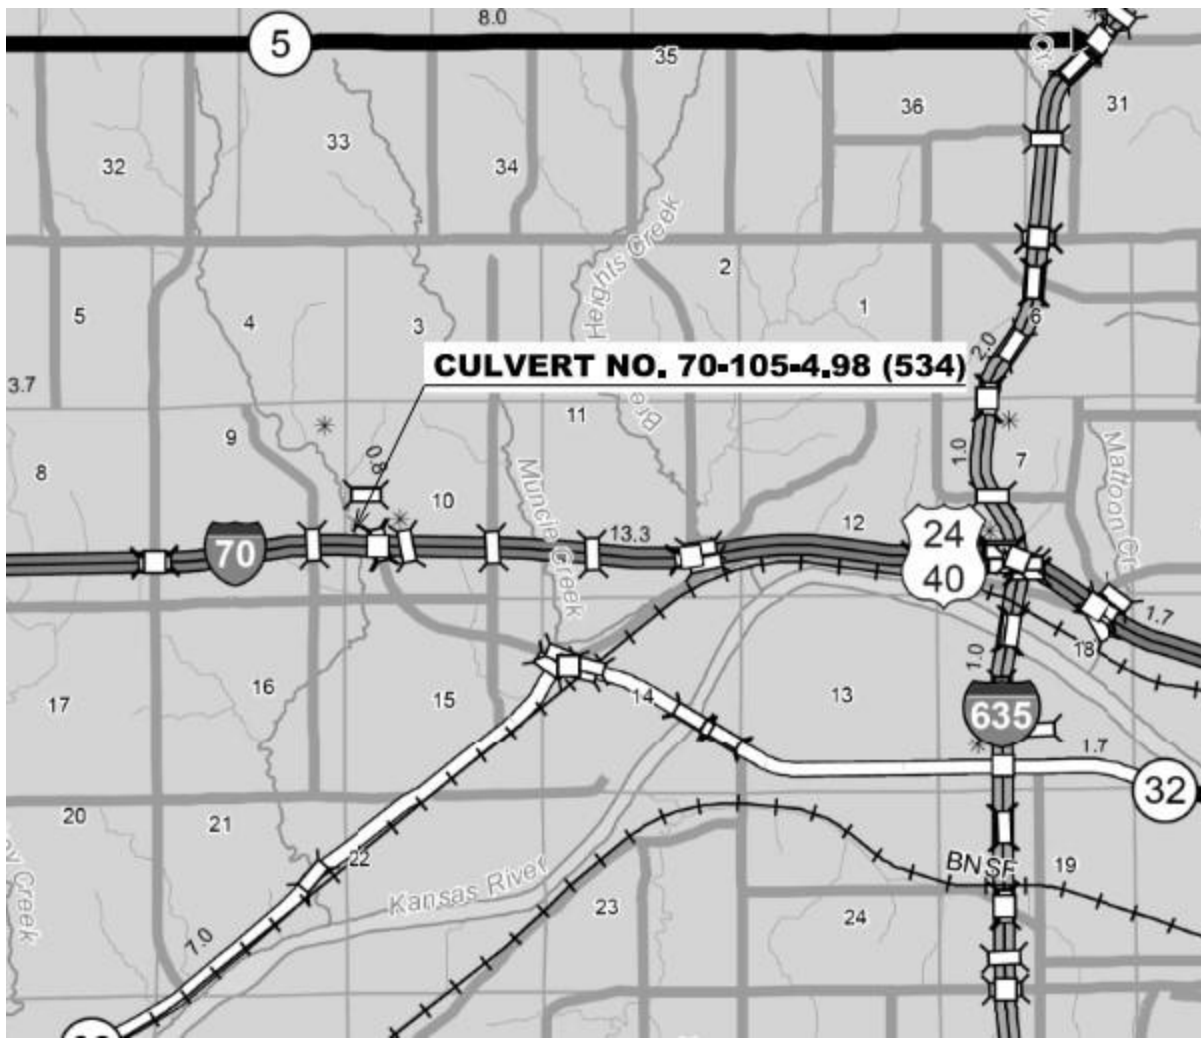

Part of the Mill Creek watershed, this Kansas Department of Transportation (KDOT) project will replace components of a reinforced concrete box culvert, which drains water from the northwest side of the I-70/Turner Diagonal interchange to the south side of I-70.

The project will take place off the roadway in the right-of-way and is not expected to impact traffic. Short-term daily lane closures may be used for loading and unloading of equipment and materials. As necessary, traffic will be controlled using digital message boards, road signs and traffic cones.

Comanche Construction, of Olathe, is the contractor for the \$256,000 project.

KDOT urges all motorists to be alert and obey the warning signs when approaching and driving through a highway work zone. To stay aware of all road construction projects across Kansas go to www.kandrive.org or call 5-1-1. Drive safely and always wear your seat belt.

Map below shows project location.
