Drivers are urged to stay alert because strong winds can result in sudden periods of limited or zero visibility due to blowing dust and or smoke during burning season.

The following driving tips are recommended when encountering a low-visibility dust storm or smoky conditions with the understanding that driver judgment is the most important factor when driving in adverse conditions:

- **Avoid driving** into or through a dust storm if possible.
- **While driving** through dust and smoke make sure to have your headlights on.
- **Do not wait** until poor visibility makes it difficult to safely pull off the roadway -- do it as soon as possible. Completely exit the highway if you can.
- **Do not stop** in a travel lane; look for a safe place to pull completely off the paved portion of the roadway.
- **Turn off all** vehicle lights, including your emergency flashers, while parked.
- **Why turn off your lights?**
  
  In the past, drivers have pulled off the roadway, leaving lights on. Vehicles approaching from the rear and using the advance car's lights as a guide have inadvertently left the roadway and in some instances collided with the parked vehicle. Make sure all of your lights are off when you park off the roadway.

- **Stop the vehicle** in a position ensuring it is a safe distance from the main roadway and away from other vehicles.
- **Set your emergency brake** and take your foot off the brake pedal.
- **Stay in the vehicle** with your seatbelt buckled and wait for the storm to pass.
- **Drivers of high-profile** vehicles should be especially aware of changing weather conditions and travel at reduced speeds.
- **A driver’s alertness** and safe driving ability is still the number one factor to prevent crashes.
