

I-135 and 47th Street

The ARRA project involves reconstruction of the I-135 and 47th Street interchange, the intersection of 47th and Broadway and improvements to the 47th Street corridor in Wichita. Work on the project will help remove a bottleneck and open the area to economic opportunities.

Multiple entities, including the City of Wichita, the state and the Kansas Turnpike Authority will benefit from the project. The \$16.1 million project was let in July and the work was awarded to Dondlinger and Sons Construction Co., Inc, Wichita. The project, which is estimated to support more than 690 jobs, is expected to be completed by winter 2011.
