

## APPENDIX A - REFERENCES

1. Alaska ITS – What is ITS?
2. Assessment of ITS Deployment: Review of Metropolitan Areas, Discussions of Crosscutting Issues, 1996
3. *“Before-and-After analysis of the San Antonio TransGuide System,”* Texas Transportation Institute, Third World Congress on Intelligent Transportation Systems, July 1996
4. Business Plan & Marketing Strategy, Colorado DOT, 1996
5. California Department of Transportation – Changeable Message Signs
6. California – How Many Closed Circuit Television Cameras (CCTV) in California?
7. Central Otago Alarms – Closed Circuit Television Cameras (CCTV)
8. *“CHART Incident Response Evaluation Final Report,”*, Silver Spring, MD, May 1996
9. *“Database will Improve Management of Incident Response Data,”* TRAC Research Review, Washington State Transportation Center, University of Washington, August 1994
10. Delaware Valley Regional Planning Commission – Intelligent Transportation System (ITS)
11. Developing Freeway and Incident Management Systems Using the I National ITS Architecture, U. S. Department of Transportation, Intelligent Transportation System Joint Program Office, August 1998
12. Developing Freeway & Incident Management Systems Using the National ITS Architecture, 1998
13. Development and Testing of Operational Incident Detection Algorithms: Executive Summary by FHWA – September 1997
14. Emergency Medial Services: LifeLink Model Deployment Initiative System Design Document, Southwest Research Institute, August 1998
15. ERCIM News – Intelligent Real-Time Closed Circuit Television –CCTV

## APPENDIX A - REFERENCES

16. Final Report: Evaluation of the ITS Planning Process, by Virginia Transportation Research Council ^ Old Dominion University, 1998
17. “*Framework for Developing Incident Management Systems*”, U S Department of Transportation, Federal Highway Administration, J. Koehne, F. Mannering and M. Hallenbeck, August 1991
18. “*Framework for Developing Incident Management Systems*” – Revised, Washington State Transportation Center, October 1995
19. Freeway Incident Management Plan and Procedures, Houston TranStar, 1998
20. *Freeway Management Handbook*, U S Department of Transportation, Federal Highway Administration by J. Carvell, K. Balke, J. Ullman, K. Fitzpatrick, L. Nowlin and C. Brehmer, August 1997
21. Garrett A Morgan Technology and Transportation Future Program – ITS for Kids
22. Cary – Chicago – Milwaukee ITS Priority Corridor, GMC Program Plan Update, July 1997
23. Freeway Management Handbook (on CD), 1998
24. Incident Management Handbook, Georgia DOT, 1996
25. “*Highway Helper Summary Report – Twin Cities Metro Area*, Minnesota Department of Transportation, Report #TMC 07450-0394, July 1994
26. <http://www.infoplease.com>
27. I-35 Incident Management and the Impact of Incidents on Freeway Operation Minnesota Department of Transportation, January 1982
28. I-65 Freeway Incident Management Study in association with Kentucky Transportation Cabinet and HNTB, Final Report, August 1994
29. I-880 Field Experiment – Analysis of Incident Data by A. Skabardonis, K. Petty, R. Bertini, P. Varaiya, N. Noemi and D. Rydzewski – Transportation Record 1603
30. I-95 Corridor Coalition, Business Plan, 1998
31. Incident Detection on An Arterial Roadway by M. Cullip and F. Hall

## APPENDIX A - REFERENCES

32. *"Incident Detection and Response System in North Dallas County,"* prepared for the Texas Department of Transportation, October 1993
33. Incident Management: Challenges, Strategies and Solutions for Advancing Safety and Roadway Efficiency – Final Technical Report, ATA Foundation in association with Cambridge Systematics, February 1997
34. Incident Management Program by MnDOT
35. Incident Management prepared by Cambridge Systems in association with JHK and Associates, Transmode Consultant, Inc. & Sydec, Inc.
36. Incident Management Successful Practices – A Cross-Cutting Study – Improving Mobility and Saving Lives by C. Johnson, Programs Manager, Operations Director, ITS Joint Program Office, FFHWA and E. Thomas, Administrator for Research, Demonstration and Innovation – Federal Transit Administration
37. Incorporating ITS Into Transportation Planning: Phase 1 Final Report, by FHWA
38. *"Incorporating ITS into Corridor Planning," Seattle Case Study.* Mitretek with support from Parson Brinckerhoff Quade and Douglas and CH2M Hill, Federal Highway Administration project number 099818E1-0A (draft), June 1999
39. Integrating Intelligent Transportation Systems Within the Planning Process: An Interim Handbook, 1998
40. Integrating ITS and Traditional Planning – Lessons Learned, I-64 Corridor MIS, 1998
41. Integrating ITS within Transportation Planning Process (Handbook), TransCore (SAIC) for FHWA, 1998
42. ITS Access
43. Intelligent Transportation System by TEDSI
44. Intelligent Transportation System Benefits – 1999 Update, Mitretek for USDOT
45. Intelligent Transportation Systems Impact Assessment Framework: Final Report by Volpe, National Transportation Systems Center, September 1995

## APPENDIX A - REFERENCES

46. Intelligent Transportation System in the Heartland – Kansas, Missouri, Nebraska and Iowa, 2000
47. “*Intelligent Transportation Systems Standards Fact Sheet*,” U S Department of Transportation, October 1999
48. “*In-Vehicle Navigation Devices: Effects on Safety of Driver Performance*,” Report #FHWA-90-053 – U. S. Department of Transportation, Washington DC, 1986
49. Intelligent Transportation System (ITS) Overview – Pima Association of Governments
50. ITS World Feature Article, ITS World, January/February 1997
51. Kansas City Scout Brochure
52. LA Traffic Study Incident Management System, December 2000
53. Los Angeles County Department of Public Works – Intelligent Transportation System (ITS)
54. Managing Incidents on Urban Arterial Roadways by R. Rauband, J. Schafer, Transpiration Research Board Record 1603
55. Metro Detroit Incident Management Coordinating Committee, Blueprint for Action, 1993
56. Metropolitan Transportation Management Center – A Case Study – Boston Central Artery, Integrated Project Control Systems – Responding to Incidents Rapidly and Effectively, October 1999
57. Missouri Department of Transportation (MoDOT) – Information for You – Intelligent Transportation System (ITS)
58. “*National Police Week Observed May 10 – 16*,” The Police Chief, International Association of Chiefs of Police, May 1998
59. New York State Department of Transportation – Changeable Message Signs
60. New York State Department of Transportation –
61. New York State Department of Transportation – Traffic Management Center
62. New York State Department of Transportation – Variable Message Signs

## APPENDIX A - REFERENCES

63. New York State Department of Transportation – Why do we need ITS?
64. Online TDM Encyclopedia – Why Manage Transportation Demand
65. Oregon Department of Transportation – Repair Slated for Traffic Detectors on State Highways
66. Potential Safety Benefits of ITS Technologies – by CTRE – Center for Transportation Research and Education
67. Principles of Highway Engineering and Traffic Analysis, by F. Mannering and W. Kilgresin
68. ProtectionTech – All About Loops
69. “*Quantifying Congestion: Phase III Final Report, National Cooperative Highway Research Program*” by T. Lomas, S. Turner, H. Pratt and H. Richard, Transportation Research Board, National Research Council, September 1996
70. Real Time estimation of Dynamic and Stochastic Networks, by LFU and L. Rillett
71. Regional Traffic Incident Management Programs – Implement Guide Programs, Implementation Guide, May 2001
72. Service Patrol Study: Greater Puget Sound Freeway System Washington State Department of Transportation, January 1998
73. Siemens – Detectors and Monitoring Systems
74. Siemens – ITS Glossary
75. Simulating Traffic for Incident Management and ITS Investment Decisions by M. Anderson and R. Souleyrette
76. Smart Travel Program Activities in VDOT, 1997
77. SmartTrek - ITS Glossary
78. SmartTrek System Engineering Requirement, Specification Evaluation Report (draft) by Cluett and Chris, July 1999
79. SOAR – Searchable Online Accommodation Resource – CCTV

## APPENDIX A - REFERENCES

80. SPLAT Controls – How Loop Detectors Work by David Gibson
81. Spokane Traffic Management Center
82. State of Washington Incident Response Team Northwest Region Guidelines by J. Althaus, Revised 1998
83. Statewide Incident Management Program Including the Detroit Metropolitan Area, March 1998
84. Strategic Plan for IVHS in the United States, 1992
85. Tahoe Basin ITS Strategic Plan
86. The Highway Safety Desk Book, International Association of Chiefs of Police, April 1996
87. The National ITS Architecture: A Framework for ITS Infrastructure by L. Simmons, <http://www.tfhrc.gov/pubrds/pr97-10/p15/html>
88. Traffic Detector Handbook, Second Edition, Institute of Transportation Engineers, Washington DC, 1991
89. Traffic Incident Management Handbook prepared for Federal Administration Office of Travel Management prepared by P. B. Farradyne, November 2000
90. *Traffic Technology International*, June/July 1998
91. Transportation Intelligence Inc. – ITS, Defense & Public Safety Communications Systems
92. United Kingdom – Introduction to Closed Circuit Television (CCTV)
93. United States Department of Transportation – Federal Highway Administration – Use of changeable Message Signs
94. “*Under Detection*”, ITS: Intelligent Transportation System, by K. Samartin, May/June 1997
95. VDOT Smart Travel Business Plan - 1997-2006, 1997

## APPENDIX A - REFERENCES

96. Wisconsin Department of Transportation Programs and Transportation Planning – ITS
97. WDOT/WSP Interagency Joint Operation Police Statement (Draft), Washington State DOT/Washington State Patrol, November 1998
98. WSDOT Web User Satisfaction Evaluation Report (Draft), Cluett and Chris, July 1999
99. 1998 Fatality Analysis Reporting System, National Highway Traffic Safety Administration, U. S. Department of Transportation, September 1995
100. 90/94 ITS Inter-City Corridor Study: Strategic Deployment Plan, 1996
