# KDOT to begin survey at Fall River Bridge on K-99

CHANUTE – Starting Monday, July 10, and continuing for approximately four weeks, the Kansas Department of Transportation (KDOT) will conduct a field survey at the Fall River Bridge on K-99. The bridge is located 2.3 miles south of the west U.S. 54/K-99 junction.

The surveyors will gather information necessary for the detailed design of the proposed future bridge replacement. The survey will take place on approximately 2,000 feet of the existing highway alignment. Activities include the use of survey instruments on the ground to determine locations of existing features within the survey corridor.

Survey crew members first will contact property owners and/or tenants for permission to enter private property. Kara LaRiviere, P.S., field survey project manager, is in charge of this survey for KDOT.
