## **U.S. 400 pavement patching project to start July 9**

On Monday, July 9, the Kansas Department of Transportation (KDOT) expects to start a major concrete pavement patching project on U.S. 400 in southeast Kansas. The project covers four counties: Greenwood, Wilson, Montgomery and Labette. It extends from the Butler-Greenwood county line east for 88 miles, ending at Trego Road east of Parsons.

The road work will begin at the western Greenwood County line and proceed east through the four counties. The contractor may operate two separate work zones, with traffic reduced to one lane guided by a pilot car at each location. Commuters should be aware that construction will start before sunrise – as early as 5:00 a.m. – and last throughout the day. Motorists can expect delays of 15 minutes or less at each work zone. The work zones will be active on weekdays Monday through Friday, weather permitting, and possibly on Saturdays.

The traveling public will be kept informed as the U.S. 400 patching moves from county to county. KDOT awarded the construction contract of \$2.6 million to Iowa Erosion Control, Inc., of Victor, Iowa. The entire project should be completed by October 2012.

According to Iola Area Construction Engineer Jerod Kelley, the road work is being done to extend the service life of the pavement. He reminds motorists to obey the signs and flaggers, slow down and “Give ‘Em a Brake!” at the work zones. Persons with questions concerning the project may contact Kelley at (620) 365-2161 or KDOT

Southeast Kansas Public Affairs Manager Priscilla Petersen at 1-877-550-5368. This highway preservation project is funded under the T-WORKS transportation program. For additional information concerning T-WORKS, visit the website, [www.ksdot.org/tworks](http://www.ksdot.org/tworks).
