Work on I-135 bridge north of Newton set to begin

Starting around Wednesday, July 10, the Kansas Department of Transportation will begin a bridge repair project on the southbound I-135 Highway bridge over East 13th Street and the BNSF Railroad located near the north city limits of Newton.

This bridge repair project will include replacement of the expansion joints followed by a polymer surface overlay, and is scheduled to be completed by October, depending on delays due to adverse weather conditions.

During construction the bridge will be limited to one lane of traffic and there will be an 11 foot width restriction in this work zone, so vehicles with widths wider than 11 feet will need to use an alternate route. Highway construction project locations and road condition information can be viewed at the http://511.ksdot.org website, or can also be accessed by telephone by dialing 511.

PBX Corporation from Sapulpa, Oklahoma is the prime contractor for this $158,000 project, which is funded by T-WORKS, the transportation program passed by the Kansas Legislature in May 2010. For more information about T-WORKS projects and funding visit the website, www.ksdot.org/tworks.
KDOT urges all motorists to be alert, obey the warning signs, and “Give ‘Em a Brake!” when approaching and driving through a highway work zone. Persons with questions about the road work or other KDOT projects can call South Central Kansas Public Affairs Manager, Martin Miller, at 620-663-3361 or 1-877-550-5368 (Toll free).
