Asphalt crack sealing project on sections of K-14, K-2, and K-8 Highways set to begin

Starting around Monday, June 24, the Kansas Department of Transportation will begin an asphalt roadway crack sealing project on sections of K-14, K-2, and K-8 highways. The section of K-14 Highway is located between K-42 Highway in Kingman County and US-160 Highway in Harper County. The section of K-2 Highway is between US-281 Highway in Barber County and the west city limits of Anthony in Harper County. The section of K-8 Highway is from between the Oklahoma state line and K-2 Highway in the City of Kiowa in Barber County.

This highway construction project is scheduled to be completed by September, depending on delays due to adverse weather conditions.

Traffic through this work zone will be controlled by flagmen and pilot car, so drivers can expect delays of up to 15 minutes. The work zone area will move daily and work will be underway during daylight hours only. Highway construction project locations and road condition information can be viewed at the http://511.ksdot.org website, or can also be accessed by telephone by dialing 511.

Kuntz Contracting Corp from Selma, Texas is the prime contractor for this $98,151 project, which is funded by T-WORKS, the transportation program passed by the Kansas Legislature in May 2010. For more information about T-WORKS projects and funding visit the website, www.ksdot.org/tworks.
KDOT urges all motorists to be alert, obey the warning signs, and “Give ‘Em a Brake!” when approaching and driving through a highway work zone. Persons with questions about the road work or other KDOT projects can call South Central Kansas Public Affairs Manager, Martin Miller, at 620-663-3361 or 1-877-550-5368 (Toll free).
