29th Street & Fairlawn Road Improvement Project Updates

On **Tuesday morning, August 17**, the sidewalk located on the west side of Fairlawn Road will reopen to pedestrian traffic in time for the start of the school season. The east side of Fairlawn Road sidewalk will remain closed until handrails can be installed along the sidewalk underneath the I-470 bridges.

On **Wednesday, August 18**, the **NO right turn restriction** from eastbound 29th Street to southbound Fairlawn Road will be removed and traffic can resume this right hand turn movement. The **NO left turn restrictions** from northbound and southbound Fairlawn Road and/or from eastbound and westbound 29th Street at the intersection will remain in place. During this phase, crews are reconstructing the medians and adjacent driving lanes on Fairlawn Road from the I-470 exit ramp to 29th Street.

Also, northbound and southbound Fairlawn Road and eastbound and westbound 29th Street will continue to be reduced to one lane in each direction for the ongoing pavement repair and median work. On **Friday, August 20**, crews will switch some of the lane closures to complete work in the lanes that were previously open to traffic.

Drivers should expect some delays and are encouraged to use alternate routes, if possible. Updated traffic information for this intersection improvement project can be viewed online at: www.ksdot.org/topekametro/laneclose.asp.

Please remember that the access roadway located south of I-470 between Fairlawn Road on the east (near Lewis Toyota) and McClure Road on the west (near Marlings Home Furnishings) is not a public street, but is located on private property. As well, drivers cannot utilize the parking lot on the northeast corner of 29th & Fairlawn as again this is private property.

Upcoming project work that will take place over the next few weeks includes the reconstruction work on the medians and pavement repair work on the northeast and northwest corners of the project, and overlay work on both Fairlawn Road and the new Connector Road.

The intersection improvement project includes the reconstruction of the 29th Street and Fairlawn Road intersection along with improvements to adjoining I-470 entrance/exit ramps. Construction improvements for 2009 include complete reconstruction of the 29th Street to westbound I-470 entrance ramp, and construction of a new Connector Road that will carry two new designated lanes of traffic from eastbound 29th Street to southbound Fairlawn Road and from the westbound I-470 exit ramp to 29th Street. Construction improvements for 2010 include the addition of a new dedicated right turn lane on the westbound I-470 to Fairlawn Road exit ramp, widening of Fairlawn Road to the east, complete reconstruction of the intersection, and the installation of additional traffic signals at the I-470 ramps to 29th Street and Fairlawn Road.

Graybeal Construction Co. Inc, is the primary contractor on this \$2.1 million intersection improvement project. The 29th Street and Fairlawn Road intersection improvement project is a cooperative effort, funded in part by the KDOT, the City of Topeka, and Shawnee County. The scheduled completion date for the entire project is early fall 2010.

The Kansas Department of Transportation urges all motorists to be alert, obey the warning signs, and “Give ‘Em a Brake!” when approaching and driving through the project work zone. For more information on this intersection improvement project, please contact Kimberly Qualls, Northeast Kansas Public Affairs Manager, at (785) 640-9340, or Steve Baalman, Field Engineering Administrator, at (785) 296-2291.
