b. Quality¹.
  - Soundness², minimum (KTMR-21) ............................................................ 0.85
  - Wear³, maximum (AASHTO T 96) ............................................................ 50%

¹Crushed aggregates with less than 10% material retained on the No. 4 sieve (excluding mineral filler supplements) must be produced from a source complying with the official quality requirements of this Section prior to crushing.

²The above requirements for soundness do not apply for aggregates having less than 10% material retained on the No. 4 sieve.

³The above requirements for wear do not apply to aggregates having less than 10% material retained on the No. 8 sieve.
