2112 - WEED CONTROL FABRIC

SECTION 2112
WEED CONTROL FABRIC

2112.1 DESCRIPTION
This specification covers the material requirements for weed control fabric.

2112.2 REQUIREMENTS
Weed control fabric can be an opaque woven or non-woven material, manufactured specifically for use as a weed barrier. Use fabric that can maintain its integrity for a minimum of 2 years in direct sunlight and has the following minimum physical properties:

- Weight ................................................................. 96 g/sq. yd.
- Grab tensile strength ........................................ 100 lbf.
- Puncture strength ............................................... 60 lbf.
- Tear strength .................................................. 45 lbf.

2112.3 TEST METHODS
- Grab tensile strength ........................................ ASTM D 4632
- Puncture strength ............................................... ASTM D 4786
- Tear strength .................................................. ASTM D 4533

2112.4 PREQUALIFICATION
None Required.

2112.5 BASIS OF ACCEPTANCE
Visual inspection of the label to verify compliance with this Section.
