### **KSICS New User Device Requirements**

The Kansas Department of Transportation requires that any radio purchased for **Public Safety** use on the State of Kansas P25 Radio System (KSICS) must be **capable** of the following features:

- Approved by P25 Compliance Assessment Program (CAP)
- P25 Phase 2
- 700/800 MHz
- Multi-key
- AES
- Over the Air Rekeying (OTAR)

The radios do not need to be ordered with these installed, but at least capable of them for programming later.

This will be effective beginning January 1, 2024.

*Approved by Kansas Department of Transportation on January 1, 2020*
