Projects Administered by KDOT

PROJECTS ADMINISTERED BY KDOT

This section provides information about the projects the Kansas Department of Transportation (KDOT) will administer for the period October 1, 2020 through September 30, 2024. The project information is presented in three appendixes- Appendix A- State Transportation Improvement Program FFY 2021-2024 Project Index, Appendix B- Summary of Total Estimated Obligations of Projects listed in Appendix A and Appendix C- State Transportation Improvement Program Advance Construction Project Index.

Appendix A lists all projects with at least one work phase anticipated to obligate for the first time within the FFY 2021-2024 STIP. The projects are indexed by county and then project number order. The appendix provides general project information including project number, work type, county, route, project length, letting type, NHS status, project program and subcategory, description, location and scope. Along with this descriptive project information is funding information including fund category and federal project number when federal funding is used; identification of project work phase(s) expected to be obligated or already obligated (approved for work); each work phase(s) year of anticipated obligation; total work phase(s) cost estimate and total project estimated cost. The total estimated project cost includes

all work phase(s) even those that are not within the period of the current STIP. For this reason, the individual work phase totals listed in the STIP may not always sum to the total estimated project cost. In addition to the total estimated cost by work phase, funding sources (state, local. federal or other) are identified along with the participation anticipated from each source.

Appendix B provides a summary of total anticipated obligation from all sources. These sources are <u>federal</u> including anticipated obligation for projects anticipated to be obligated for advance construction (AC)), <u>state and local</u> obligations. The sum of anticipated obligation is provided by year and by phase. However, Appendix B does <u>not</u> include projects within the MPO areas. The summary is strictly limited to those projects administered by KDOT and listed in Appendix A.

Listed in Appendix C are estimated conversion amounts for <u>all</u> projects designated as AC <u>including projects</u> <u>within MPO boundaries</u>. Projects are arranged by county and project number order. General project information is provided including the route, project description, project work type, the year(s) of expected conversion, the anticipated conversion amount for each year of conversion and the total anticipated conversion amount for each project. Conversions projected to occur after the four years of the STIP are grouped together in a single column titled "After 2024 Planned Conversion". A sum of total conversions by year for each of the four STIP years and for the Planned Conversion after 2024 is provided. Additionally, a total planned conversion amount that includes all years is provided.

All projects designated with AC are done so with federal approval and have been initiated in advance of federal fund authorization for that specific project. All costs incurred on the project while designated as an AC project are the responsibility of the initiating entity (State/Local/Other). In the future when federal aid apportionment and obligation authority becomes available, the AC funded projects are "converted" to federal funds and reimbursement is requested.

The Project Index, Appendix A, and the Advance Construction Project Index, Appendix C, may have overlapping projects. This occurs when a project has an estimated obligation within the STIP period in one work phase and has an expected advance construction conversion in a different work phase, which results in the project appearing in Appendix A and/or Appendix C. Likewise, it is possible for a project to appear in Appendix C and not be in Appendix A. In this scenario, all project work phase obligations have occurred in prior years or are scheduled for future years – not in the STIP period and are not being reported in the STIP, while the work phase(s) using advance construction has yet to convert.

The project information provided by Appendixes A, B, and C is not the same subset used to generate the funding information provided in the Estimated Obligations for KDOT, Local, Metro Projects table in the Program Financing section. While the information in the Estimated Obligation table includes estimated obligations for the federal projects listed in Appendix A, the table also includes estimated obligations for projects funded with federal funds in MPO areas. These MPO area projects are not included in Appendix A. Additionally, the information in Appendixes A, B & C includes all projects administered by KDOT including projects that are not funded with federal funds. The Estimated Obligation table is only concerned with federally funded projects. Additionally, the Appendix B Summary totals for each year include AC projected to obligate. However, the projected obligation of AC is not included in the Estimated Obligations for KDOT, Local, Metro table in the Program Financing section. These differences preclude the summing of Appendix B Summary totals by year and Appendix C-Total Anticipated AC conversion by year to arrive at the total federal obligation for a year as provided in the Estimated Obligations for KDOT, Local, Metro Projects table in the Program Financing section. They simply are not the same data sets and can not be compared in this manner.

The project indexes include the following project related information – Appendix C information is identified by an (*); Appendix A provides all items listed below except for Planned Conversion and Total Planned Conversion which are in Appendix C only.:

- <u>County*</u> identifies county where work occurs
- <u>Fund Category Code</u> how the project is funded; one line is *shown for each type of funding* used on a project
- <u>Letting Type</u> identifies whether a project is being let or not and if let who is letting the project
- <u>NHS Project</u> indicates whether project is on the National Highway System
- <u>Planned Conversion*</u> anticipated dollar amount to be converted to federal funds through the conversion of AC project
- <u>Program</u> –broad categories that identify similar bodies of work. In KDOT there are four general construction programs that group projects- Preservation, Modernization, Expansion and Local.
- Project Length in miles
- <u>Project Location</u> brief description of where the project is
- <u>Project Name</u>* –general description of the project
- <u>Project Number*</u> -KDOT number used to track individual project work
- <u>Project Scope</u> –general description of the work being performed
- <u>Route*</u> identifies route on which work occurs
- <u>Subcategory</u> grouping(s) of projects based on similar work types and sometimes funding within a program. A subcategory is a subdivision within a program of work.
- <u>Work Phase</u> identifies the phase of work being performed
- Work Phase Estimate the estimated cost to complete the phase of work.

- <u>Work Phase Estimated Obligation Amount</u> expected dollar amount to be obligated for the work phase by fund category.
- <u>Work Phase Fund Prorata</u> the percentage of the funds for the work phase being contributed by the fund category
- <u>Work Phase Fund Prorata</u> the percentage of the funds for the work phase being contributed by the fund category
- Work Phase Obligation FFY the federal fiscal year in which the work phase is anticipated to be obligated
- <u>Work Type*</u> the type of work to be accomplished during the project
- <u>Total Planned Conversion*</u> sum of all anticipated advance construction conversions for a project.

Listed below are definitions for the <u>work type</u> acronyms used in the project indexes (Appendixes A and C).

O- Operations —*

KLM- KDOT DAIX 0403 Funded CMT- Contract Maintenance, DAIX 0403 Funded M Jurisdiction

*The Operations program is not a "Core" program and is not discussed in the Project Selection Criteria section of this document because in general the projects in this program are not construction type projects. The projects in this program are related to research, planning, training and overhead and as such most are not required to be listed in the STIP document, but many are covered by other reports and documents. However, like the core programs projects under the operations program are grouped by similar characteristics into subcategories. Two subcategories of projects from the Operation Program are listed in the STIP Appendix A -the Disadvantaged Businesses Enterprises (DBE) Program projects and the Stockpile Contract Maintenance projects. The DBE program of projects is a program with federal funds allocated annually by FHWA from the Federal transportation act and, therefore, is required to be included in the STIP. In KDOT. DBE projects are assigned the subcategory KLM and are grouped in the Operation program because they are training related. The second project type is the 'M' jurisdiction stockpile projects. These projects are for the storage of materials for KDOT's surfacing projects. Since the KDOT surfacing projects which are

either funded with state and federal funds or state funds only are listed in the STIP, their associated stockpile projects are listed as well. The stockpile projects are grouped in the CMT subcategory of the Operation program.

HOW TO READ THE STIP PROJECT INDEX- APPENDIX A

The project index, Appendix A, lists projects anticipated to have one or more phases or work obligate in the State of Kansas during the four years of the STIP. The index provides all expected obligations- federal, state, local and other. Below is a diagram that identifies the fields provided for the projects listed in Appenidx A.

KDOT Project Number (no two projects have the exact same number); However, related projects often differ by suffix number only. Example: KA- 0410-01 and KA-0410- 02 - the 01 project was for the design and the 02 was for the construction.	Acronym for the type of work being performed; A list of work type acronyms and definitions is provided in the Projects Administered by KDOT section	───> Work Phase Es ∧	T divides constru Const timated Amount	iction project wor ruction phases ar estimates the tot	re combined.
