Projects Administered by KDOT

PROJECTS ADMINISTERED BY KDOT

This section provides information about the projects the Kansas Department of Transportation (KDOT) will administer for the period October 1, 2022 through September 30, 2026. The project information is presented in three appendixes- Appendix A- State Transportation Improvement Program FFY 2023-2026 Project Index, Appendix B- Summary of Total Estimated Obligations of Projects listed in Appendix A and Appendix C- State Transportation Improvement Program Advance Construction Project Index.

Appendix A lists all projects with at least one work phase anticipated to obligate for the first time within the FFY 2023-2026 STIP. The projects are indexed by county and then project number order. The appendix provides general project information including project number, work type, county, route, project length, letting type, NHS (National Highway System) status, project program category and subcategory, description, location, and scope. Along with this descriptive project information is funding information including fund category and federal project number when federal funding is used; identification of project work phase(s) expected to be obligated or already obligated (approved for work); each work phase(s) year of anticipated obligation; total work phase(s) cost estimate and total project estimated cost.

The total estimated project cost includes all work phase(s), even those that are not within the period of the current STIP. For this reason, the individual work phase totals listed in the STIP may not always sum to the total estimated project cost. In addition to the total estimated cost by work phase, funding sources (state, local. federal or other) are identified along with the participation anticipated from each source.

Appendix B provides a summary of total anticipated obligation from all sources. These sources are <u>federal</u> (including anticipated obligation for projects anticipated to be obligated for advance construction (AC)), <u>state and local</u> obligations. The sum of anticipated obligation is provided by year and by phase. However, Appendix B does <u>not</u> include projects within the MPO areas. The summary is strictly limited to those projects administered by KDOT and listed in Appendix A.

Listed in Appendix C are estimated conversion amounts for <u>all</u> projects designated as AC, <u>including projects within MPO boundaries</u>. Projects are arranged by county and project number order. General project information is provided including the route, project description, project work type, the year(s) of expected conversion, the anticipated

conversion amount for each year of conversion and the total anticipated conversion amount for each project. Conversions projected to occur after the four years of the STIP are grouped together in a single column titled "After 2026 Planned Conversion". A sum of total conversions by year for each of the four STIP years and for the Planned Conversion after 2026 is provided. Additionally, a total planned conversion amount that includes all years is provided.

All projects designated with AC are done so with federal approval and have been initiated in advance of federal fund authorization for that specific project. All costs incurred on the project while designated as an AC project are the responsibility of the initiating entity (State/Local/Other). In the future, as federal aid apportionment and obligation authority becomes available, AC funded projects are "converted" to federal funds and reimbursement is requested.

The Project Index, Appendix A, and the Advance Construction Project Index, Appendix C, may have overlapping projects. This occurs when a project has an estimated obligation within the STIP period in one work phase and has an expected advance construction conversion in a different work phase, which results in the project appearing in Appendix A and/or Appendix C. Likewise, it is possible for a project to appear in Appendix C and not be in Appendix A. In this scenario, either all project work phase obligations have occurred in prior years or the work phases remaining to obligate

are scheduled for future years, which means that no phases of work are scheduled to obligate during the years of this STIP, so the project is not listed in Appendix A, the Project Index. However, since a work phase(s) with advance construction remains to be converted, the project continues to be listed in Appenidx C, the AC conversion list.

The project information provided by Appendixes A, B, and C is not the same subset used to generate the funding information provided in the Estimated Obligations for KDOT, Local, Metro Projects table in the Program Financing section. While the information in the Estimated Obligation table includes estimated obligations for the federal projects listed in Appendix A, the table also includes estimated obligations for projects funded with federal funds in MPO areas. These MPO area projects are not included in Appendix A. Additionally, the information in Appendixes A, B & C includes all projects administered by KDOT including projects that are not funded with federal funds. This is to ensure that any state funded projects that may be considered regionally significant by FHWA are included in the STIP. The Estimated Obligation table is only concerned with federally funded projects. Additionally, the Appendix B Summary totals for each year include AC projected to obligate. However, the projected obligation of AC is not included in the Estimated Obligations for KDOT, Local, Metro table in the Program Financing section as a project designated with AC is not considered to be

federally funded. These differences preclude the summing of Appendix B Summary totals by year and Appendix C-Total Anticipated AC conversion by year to arrive at the total federal obligation for a year as provided in the Estimated Obligations for KDOT, Local, Metro Projects table in the Program Financing section. They simply are not the same data sets and can not be compared in this manner.

The project indexes include the following project related information – Appendix C information is identified by an (*); Appendix A provides all items listed below except for Planned Conversion and Total Planned Conversion which are in Appendix C only:

- County* identifies county where work occurs
- Fund Category Code how the project is funded; one line is shown for each type of funding used on a project
- <u>Letting Type</u> identifies whether a project is being let or not and if let who is letting the project
- NHS Project indicates whether project is on the National Highway System
- Planned Conversion* anticipated dollar amount to be converted to federal funds through the conversion of AC project- in Appendix C.
- Program –broad categories that identify similar bodies of work. In KDOT there are four general construction programs that group projects- Preservation, Modernization, Expansion and Local.
- Project Length in miles
- <u>Project Location</u> brief description of where the project is
- <u>Project Name</u>* –general description of the project

- Project Number* -KDOT number used to track individual project work
- <u>Project Scope</u> –general description of the work being performed
- Route* identifies route on which work occurs
- <u>Subcategory</u> grouping(s) of projects based on similar work types and sometimes funding within a program. A subcategory is a subdivision within a program of work.
- Work Phase identifies the phase of work being performed
- Work Phase Estimate the estimated cost to complete the phase of work.
- Work Phase Estimated Obligation Amount expected dollar amount to be obligated for the work phase by fund category.
- Work Phase Fund Prorata the percentage of the funds for the work phase being contributed by the fund category
- Work Phase Fund Prorata the percentage of the funds for the work phase being contributed by the fund category
- Work Phase Obligation FFY the federal fiscal year in which the work phase is anticipated to be obligated
- Work Type* the type of work to be accomplished during the project
- <u>Total Planned Conversion*</u> sum of all anticipated advance construction conversions for a project- Appendix C.

Listed below are definitions for the <u>work type</u> acronyms used in the project indexes (Appendixes A and C).

Listed below are the four core KDOT program categories and their associated subcategories. The program abbreviation and subcategory abbreviations are provided as part of the project information in the project index, Appendix A that follows this section.

P- Preservation —

Taking Care of What We Have

1RR- Non-Interstate Resurfacing (PMS 1R)

BCR- Culvert Repair

BSP-Bridge Painting

BSR- Bridge Repair

CMN- Contract Maintenance (PMS)

EMR- Emergency Repair

IRP- Interstate Basic Improvement

ISR- Interstate Resurfacing (PMS)

NHP- Miscellaneous for Preservation

PBR- Bridge Replacement/Rehabilitation

PCR- Culvert (to Bridge) Rehabilitation

PDR- Bridge Redeck

PMR- Pavement Marking

PPP- Preservation Plus

RIP- Non-Interstate Basic Improvement

RRS- Railroad Crossing Surfacing

SLR- Signing & Lighting Repair and Replacement

SOS- Highway Signing

SRR- State Route Removal Program

M- Modernization —

Safety & Shoulder Improvements

1RS- Resurfacing with Improvements (Practical Design)

COR- Corridor Management

GFU- Guard Fence Upgrades

GSI- General Safety Improvement Projects

ICT- Innovative Connected Technologies

IRI- Interstate Roadway Geometric Improvements

KCC- KCC Railroad Crossing Projects

LTG- Highway Lighting

MPR- Miscellaneous for Modernization

RIM – Non-Interstate Geometric Improvement

SAF- State Safety Projects

SBW- Scenic Byways

SSI- Strategic Safety Improvement

E- Expansion/Enhancement —

Adding Something New

AAR- Advanced Acquisition of ROW

CSP- Cost Share Program

EDP- Economic Development

IRC- Interstate Capacity Improvement

ITS- Intelligent Transportation Systems

RIC- Non-Interstate Capacity Improvement

RSL- Local Partnership Railroad Grade Separations

RSP- New Railroad Grade Separations (State)

L- Local Construction —

Work on Local Roads

HAZ- Safety Projects (HSIP, off-system)

HES- Safety Projects (HSIP, on-system)

K1R- KLINK Surface Preservation

K2R-KLINK Pavement Restoration

K3R- Geometric Improvements for KLINKs

LBT-Local Bridge Transfer Program

LOC- Local Construction

(Local Administered & Let)

RES- Local Construction

(KDOT Administered & Let)

RRX- Railroad Crossing Protection

(HSIP, on-system)

RXR- Railroad Crossing Protection

(HSIP, off-system)

SRT- Safe Routes to Schools (Federal)

TEX- Transportation Enhancement Program

O- Operations —*

KLM- KDOT DAIX 0403 Funded

CMT- Contract Maintenance, DAIX 0403

Funded M Jurisdiction

*The Operations program is not a "Core" program and is not discussed in the Project Selection Criteria section of this document because generally this program of projects are not construction type projects. Typically, the projects in this program are related to research, planning, training and overhead, and as such most are not required to be listed in the STIP document but may be covered by other reports and documents. However, like the core programs, projects under the Operations program are grouped by similar characteristics into subcategories. Two subcategories of projects from the Operation program are listed in the STIP Appendix A -the Disadvantaged Businesses Enterprises (DBE) Program projects and the Stockpile Contract Maintenance projects. The DBE program of projects is a program with federal funds allocated annually by FHWA from the Federal transportation act and, therefore, is required to be included in the STIP. In KDOT, DBE projects are assigned the subcategory KLM and are grouped in the Operation program because they are training related. The second project type is the 'M' jurisdiction stockpile projects. These projects are for the storage of materials for KDOT's surfacing projects. Since the KDOT surfacing projects which are either funded with state and federal funds or state funds only are listed in the STIP, their associated stockpile projects are listed as well. The stockpile projects are grouped in the CMT subcategory of the Operation program.
