Annual Average Daily Traffic (AADT)
Traffic Counts Recorded in CY 2013

| LEGEND | |
|--------|-----------------------------|
| | Over 10,000 |
| | 7,500 to 10,000 |
| | 5,000 to 7,500 |
| | 2,500 to 5,000 |
| | 1,000 to 2,500 |
| | Less than 1,000 |
| | 1000 Short-term Counter |
| | 1000 Vehicle Classifier |
| | 1000 Continuous Counter |
| | 2600 Total Volume |
| | 300 Heavy Commercial Volume |

The traffic counts shown on this map represent estimates of the Annual Average Daily Traffic (AADT) for the year ending December 31, 2013. These AADT's are derived mainly from 24-hour volumes recorded by portable traffic counters. These short-term counts are adjusted for day-of-week and seasonal variations using data from 80 continuous permanent counters. An axle correction factor has been applied to each short-term count. Heavy commercial volumes are derived from short-term vehicle classification counts. These count locations are indicated by bold numbers on the map. Heavy commercial counts at other locations are estimated from nearby counts on the same route or from other routes known to have similar traffic characteristics. AADT's that are provided by continuous counters are underlined.
