The traffic counts shown on this map represent estimates of the Annual Average Daily Traffic (AADT) for the period ending June 30, 2007. These AADT values are derived mainly from five-year counts made by parallel traffic counts. These traffic counts are supplemented by other survey data including, but not limited to, 24-hour traffic counts. The AADT values in this map are given in hundreds of vehicle trips per day. Area codes and county names were edited for clarity. Major roadways were altered slightly for visibility. Traffic counts on Federal-aid routes from other data sources are shown in blue on the map.
