FOR IMMEDIATE RELEASE

For Friday, November 20, 2009 - Johnson County

I-35

Sometime before rush hour on Friday, November 20, southbound I-35 traffic will be switched back to the southbound (west) side of I-35 at the new Lone Elm Road interchange. Both northbound and southbound I-35 traffic will now be back on the original sides of the roadway.

In early March 2009, southbound I-35 traffic was shifted to the northbound (east) side of I-35 for construction work on the new I-35 and Lone Elm Road interchange project. Construction on the interchange will resume in the spring. The new ramps at the interchange will not open until the project is completed. The new I-35 and Lone Elm Road interchange is scheduled to open in mid-summer 2010.
