I-435 Repair & Resurfacing Project Completed in Johnson County

On Tuesday, November 23, a repair and resurfacing project for northbound/westbound and southbound/eastbound I-435 stretching from 87th Street to Antioch Road in Johnson County was completed and the roadway reopened to all traffic. Crews still have some finishing and cleanup work to complete for the next couple of weeks, but this work will not require any major overnight and/or weekend lane closures.

Project work, which began in early July 2010, included concrete pavement patching, mill and asphalt overlay work, and ultra thin bonded overlay work. In addition, new pavement markings were applied to all resurfaced areas. The project work is completed just in time for the upcoming winter season and will now provide motorists with a much smoother driving surface.

Superior Bowen was the primary contractor on this resurfacing project with a total revised contract cost of $3.9 million, as almost 45 percent more pavement patching was added to the project once the job began in early July.

For questions or additional information on this repair and resurfacing project, please contact Kimberly Qualls, Northeast Kansas Public Affairs Manager, at (785) 640-9340, or Ruben Noguera, Field Engineering Administrator, at (913) 764-4525.
