## **Current Road Conditions**

**The snow has begun to fall throughout the northeast Kansas area. KDOT crews are out on the roadways treating and plowing in the areas where the snow has begun falling and accumulating. See the chart below for current roadway conditions for individual northeast Kansas counties.**

No pre-treating was done in advance of the storm due to the rain, as it would simply wash any treatment product off the roadways.

Please remind DRIVERS as they travel about during the next couple of days to:

1. Take it SLOW!
2. Allow plenty of extra drive time.
3. Watch for icy/slick spots on the roadway; don't assume that if the pavement looks clear, that it is.
4. Buckle up every passenger, every time.

## **Driver Safety Tips**

For travel throughout the evening and overnight hours, drivers should use caution, allow plenty of driving time, buckle up (every passenger, every time) and be sure to turn on their headlights, and turn off their cruise control. Drivers should also provide for a safe distance or cushion between themselves and vehicles ahead of them.

We also want to remind drivers to stay a safe distance back from KDOT snow plows, and if drivers should pass the snow plows, to be extra careful and allow plenty of room as the trucks do travel slower than surrounding traffic.
