KDOT Wants Your Feedback on the Johnson County Gateway Project

The Kansas Department of Transportation's Johnson County Gateway: I-435/I-35/K-10 Design-Build Project is asking for public input through a new online survey. This survey focuses on how motorists are receiving information regarding traffic impacts during construction. KDOT wants to gain a better understanding of what drivers want to know about traffic during construction, when they want it, and how they get that information. The survey can be found on the project website or directly at this link: <https://www.surveymonkey.com/s/JCGCommunications>

The online survey will remain open for public input through Friday, November 7, 2014.

Construction started this past spring and all Phase 2 improvements will be substantially complete by December 31, 2016. The \$288 million project is KDOT's largest construction project to date and its first design-build project. Nearly 90 percent of the existing problems drivers experience today and 50 percent of projected 2040 traffic problems will be addressed by the current construction.

Updated daily traffic information for the **#jocogateway** interchange project can be viewed at: www.jocogateway.com and for the entire Kansas City Metro Area at: www.ksdot.org/kcmetro/laneclose.asp.
