K-32 work starts June 5, traffic delays expected

Work will resume to place a chip seal on K-32 from Bonner Springs west to the U.S. 24 junction near Lawrence on Monday, June 5, according to the Kansas Department of Transportation.

The project in Wyandotte and Leavenworth counties will require daily lane closures with traffic carried through the work zone following a pilot car. Motorists should expect delays of up to 15 minutes.

Work will take place from sunrise to sunset with the possibility of work on Saturdays as well. The lane will have an 11-foot width restriction. The project is expected to take two weeks, weather permitting.

The asphalt pavement on this stretch of K-32 was patched last summer. The chip seal work was delayed due to a material shortage last construction season.

Vance Brothers, of Kansas City, Mo., is the contractor on the project.

Motorists are asked to use extra caution in the work zone area.
