Good plans, good decisions

The comedian George Burns used to say that he looked to the future because that’s where he planned to spend the rest of his life. While I won’t get any laughs for putting my own spin on his comment (maybe if I put on big glasses and chomp down on a cigar), I whole-heartedly agree with his sentiments.

With apologies to George, I’m looking to the future, too, because that’s where I’m going to be traveling the rest of my life. And just how I will be traveling in this state during the next few decades will be shaped by the state’s Long Range Transportation Plan (LRTP), which we began working on this summer.

Transportation users generally focus on their needs today. But we at KDOT must focus on needs that are 10, 15, 20 years in the future. Even if our system had no unmet needs today, there certainly will be some in time as the infrastructure wears out. On behalf of the state’s taxpayers, it’s time for us to start thinking about those future needs.

The LRTP will be a comprehensive document that is driven by analysis and data. It will include demographic and economic trends, freight analysis, state funding capacity and funding sources. It will also consider the importance of all modes of transportation, including highways, rail, air, public transit and bicycle and pedestrian facilities, in meeting future challenges.

While we as the state’s transportation agency have a responsibility to help people understand our future system needs, we also need to listen to local leaders to understand how they see their communities changing and developing. We want the state’s future transportation plan to best serve their communities.

We’ve hired HDR, Cambridge Systematics and HNTB as the consulting team to help with development of the plan. Three advisory committees – one internal and two external – are being formed to engage stakeholders in Phase I.

It would be hard to overstate the importance of the work that will take place over the next year and a half on the LRTP. After all, we’re talking about how we will invest billions of dollars and it’s essential that we spend that money in a way that benefits the state.

Good planning makes for good decisions. And our best bet for making good decisions about the future where you and I will be driving is to have a plan that is inclusive, thorough and forward-thinking.

The LRTP will be developed in three phases:

- **Phase I (September 2006 to February 2007).** This will provide background information on trends, needs and the direction of the current programs through 2030 to build a framework for the LRTP.
- **Phase II (February to September 2007).** Transportation solutions and strategies will be drafted.
- **Phase III (October to December 2007).** The Kansas Long Range Transportation Plan will be finalized and rolled out.

The LRTP will be a requirement of the federal transportation act, SAFETEA-LU, and will be an update of an existing plan. But this plan isn’t likely to resemble the last version that was put together in 2002. Transportation needs, costs and forecasts can change greatly and this plan will be reflective of that.

Calendar of Events

**October 3-4** – KDOT Operations Meeting in Great Bend.

**October 10** – 11 a.m. KDOT employees’ Council Meeting, Third Floor, Eisenhower State Office Building.

**October 13** – 9 a.m. Highway Advisory Commission meeting telephone conference call.

**October 18** - 1 p.m. Construction Bid Letting, Fourth Floor West Wing, Eisenhower State Office Building.
Emig retires after 40 years at KDOT

By Kim Stich

“Learn all you can about everything and you will never regret it.”

Larry Emig, Chief of Local Projects, has tried to follow these words of wisdom that his father told him many years ago.

Emig started his career at KDOT in June 1966 in the Engineering Training Program and enjoyed learning about the different bureaus. He then worked in Shawnee and Edwardsville Subarea employees contributed to the success of the Susan G. Komen Breast Cancer Foundation walk by providing traffic control on K-7 from Bonner Springs to Shawnee on Sept. 15. Crews closed down the right lane of northbound K-7 so the more than 1,100 walkers could complete a three-mile stretch of their 60-mile, three-day trek. The event raised more than $2.8 million.

Highway dedicated to former K-State coach Bill Snyder

MANHATTAN - Motorists traveling in the Manhattan area will notice a new name for the stretch of highway on US-24 and K-177. The Coach Bill Snyder Highway was officially dedicated at a sign unveiling ceremony September 20, at the student union on the Kansas State University (KSU) campus in Manhattan.

The signs were unveiled during the ceremony by Coach Snyder and his family. Governor Kathleen Sebelius and Rep. Ed O’Malley were on hand to help with the unveiling.

Seitz named Bureau Chief

By Stan Whitley

Ron Seitz, who has served KDOT the past two decades as a Professional Civil Engineer, has been selected to lead the Bureau of Local Projects as its new chief.

“I’m excited about moving into my new capacity as Chief of Local Projects,” said Seitz. “I want to build on what we’ve done well in the past and look for new ways to better serve local governments and ultimately the people of Kansas.”

Seitz has been an Assistant Bureau Chief in Local Projects the past five years where he was in charge of the Technical Management Section. The main responsibility of the section was the review and processing of local federal-aid and state-funded road and bridge...
You’re hot, tired and thirsty. You can taste the dust in your mouth and it feels like the asphalt is burning right through your boots.

You’ve been standing here for 30 minutes with no one around but the people on your work crew behind you, a farmer on a tractor in a nearby field kicking up dirt that seems to swirl around you endlessly and a pheasant that just wandered by.

Beneath the noise of the wind, the tractor and your own crew, your ears detect a faint whine, the sound of tires on pavement. As you scan the horizon, sure enough, there’s something coming down the road. You stand a little straighter, grab the sign paddle more firmly and make sure you’re holding it up where the approaching driver can see it.

“You move around, wave the paddle, whatever it takes to be seen,” says Jerry Graham, Equipment Operator on the Tribune Sub-area crew. “You’ve got to be seen.”

Probably every equipment operator (and many who aren’t equipment operators) has done it—flagged traffic on the highway.

“Flagging’s probably on the bottom of the pole,” Graham admits. “I love to run equipment.”

Graham got plenty of experience flagging traffic when he started out as summer help in Tribune three years ago.

“I mostly flagged all summer, because I didn’t have a CDL (Commercial Drivers’ License).”

The 47-year-old has filled many roles over the years—locksmith, welder, carpenter—so he’s not afraid to tackle the varied tasks a typical highway maintenance crew will take on, even flagging traffic, which he calls more dangerous than other road maintenance activities, “because you’re just standing out there.” He says they usually rotate the duties on a job, flagging for only a couple of hours at a time and then switching off to prevent boredom, which can be a problem on some of the less-traveled roads in western Kansas.

Allen Phillips, Highway Maintenance Supervisor in Tribune, says flaggers have to be on their toes, because some drivers aren’t. “It doesn’t matter how many signs you’ve got out there. They just don’t see you.”

Graham agrees. “I had a guy come up in a car, talking on a cell phone. I guess he didn’t see me and he went right on through, so I radioed ahead. I’d say 90 percent of the close calls are because of cell phones.”

He emphasizes that radios are critical tools in the work zone. Otherwise, “the guys working ahead have no idea. You can turn and yell and hope somebody
Numerous events took place this summer across the United States to celebrate 50 years of Interstates. One of the main activities was the reenactment of the first Transcontinental Motor Convoy of 1919.

Even though the original trip did not pass through Kansas, part of the convoy detoured through Kansas from June 21 to 23.

Hosting this part of the national convoy for two days with a variety of events taking place and keeping the trip across Kansas on schedule was no small feat. With an outstanding team effort involving more than 160 KDOT employees and 28 partnering organizations, “Kansas’ celebration was a true success because of the hard work and dedication of everyone involved,” said Julie Lorenz, KDOT Director of Public Affairs.

Members of the 50th Anniversary Celebration Team were honored for their efforts in KDOT’s Example of Excellence employee recognition program for the second quarter of 2006 with events in Topeka, Salina and Hays through a video conference on Sept. 13.

The convoy traveled safely and efficiently along I-70 with the Kansas National Guard and the Kansas Highway Patrol leading the way. More than 100 vehicles joined the convoy from Abilene to Kansas Speedway.

An evening social, a car show, an
More than 800 people attended the 8th annual Maintenance Training Expo September 6 and 7 at the Bicentennial Center in Salina. The expo, co-sponsored by KDOT and the American Public Works Association, included such topics as chain saw safety, identifying meth lab materials and the popular ride and drive equipment operation, which gives attendees the opportunity to operate equipment they might not be familiar with. John Barton, with the Texas Department of Transportation, who presented the keynote address at the expo, was so impressed that he expressed his hope to start a similar expo in Texas in the future, according to Jaci Vogel, Assistant Bureau Chief in Construction and Maintenance.
Dear Deb:

I send words of praise to you and your staff. Recently, some of our staff had the privilege – and it was a privilege – to work with your video production folks in KDOT’s Public Information Division (Support Services). Beth Martino, KDOL’s Director of Communications, was working on a project to create a video to help explain our Unemployment Insurance Modernization project. We needed the video for our quarterly Managers’ Meeting.

Beth reported to me that the KDOT folks were wonderful to work with, were responsive to our needs and simply made the whole experience a truly positive one.

Moreover, the quality of the end product was great. You have very talented individuals working in this unit.

We appreciate the opportunity to share in the talent you have at KDOT. I am impressed with the “one state government” attitude reflected at KDOT. It was a refreshing experience for everyone involved at KDOL.

Thanks again for the cooperative spirit and the help provided to the Department of Labor.

Very truly yours,
Jim Garner, Secretary
Kansas Department of Labor

Dear Mr. Bruce Heerts,

I wanted to drop you a note and say “Thank You” for you and your crew’s assistance with the fatality vehicle accident on August 18, 2006.

By diverting traffic you enabled Lindsborg EMS and Lindsborg Volunteer Fire Department to focus on the rescue and treatment of the individuals involved in the accident and removed the worry of having to deal with vehicles. This created a safer working environment for emergency personnel during a high stress incident.

Sincerely,
Gregory DuMars
City Administrator
Lindsborg

(Editor’s Note: Heerts is the Highway Maintenance Supervisor at Lindsborg.)

Dear Deb:

I have had several of the emergency personnel who worked the accident comment on how much they appreciated your efforts. On behalf of the Lindsborg emergency personnel, City Council and staff, “Thank You!” We are fortunate to have you and your staff here in Lindsborg.

The folks at the Traffic Safety Bureau helped Wichita Public Schools apply for a grant so each of our 57 elementaries plus the special day schools would have at least 3 boosters, giving the principal, social worker plus all campus security staff access to boosters for the little ones. During the course of the summer I spoke to most of the staff in Traffic Safety -- and I can attest each person was extremely helpful, friendly and willing to help the state’s largest school district find a solution. The grant application was smoother than most we see!!

Last week over 200 boosters were delivered to the individual schools throughout the district thanks to Traffic Safety’s quick work.

I know we all tend to hear and voice the negative. I wanted to take this opportunity to voice a positive and to let you know we appreciated the help (and dollars!!) of your staff.

Diane Gjerstad
I began my KDOT career at Marion in 1986. Most of the engineers and technicians working in Marion at that time had worked for KDOT for, well, forever. Many of them were around when the Interstate highways were designed and built in the late 1960s and early 1970s. All but two of the engineers and technicians in that office had anywhere from 25 to more than 40 years experience with the KDOT (or with the Highway Commission as some still called it).

There were new construction projects that next summer in every direction and the office had inspectors from Great Bend to Wamego helping out. It was a very busy time. I appreciated all the patience those “experienced” employees had with me and the time they took to train me as well as explain KDOT history.

Since the early days, I have had the privilege of having some great mentors at KDOT. My mentors have included Administrative Support Staff, Technicians, Engineers, Equipment Operators, Maintenance Supervisors, Superintendents, Contractors and Consultants. Sharing advice and experience has helped in many ways. Mentoring helps develop our technical competence, as well as helps us understand how and why we do things. It helps with our communication skills and especially with our confidence.

One common misconception is that you need to be a supervisor or manager to be a mentor. Anyone who knows their job or a specific process that needs to occur to accomplish a task can be an effective mentor.

I remember some early supervisors I had while working in high school and college. The ones I admired and strove to be like were always optimistic, supported their employee’s decisions, had strong goals, and they never asked people to do anything they wouldn’t do or hadn’t done themselves. They cared about the work. But they also cared about the people they worked with. They led by example. They understood that what we can accomplish together is much, much more than any one of us can accomplish alone. I strongly believe that positive role models have a lasting impact on our attitudes and on our accomplishments.

Every employee has valuable experience and knowledge. I strongly encourage you to take the time to share that experience and knowledge with other employees, regardless of where you work in this agency!

Mentor or be mentored! It is amazing what you can learn while helping someone else.

Jim Kowach is Chief of the Bureau of Design.
Celebrating 40 years of service

KDOT employees celebrating 40 years of state service pose for a picture with Secretary Deb Miller on Aug. 25. They are (front row, left to right) Clarence Berry, Mary Salazar, Kenneth DeLong, (back row) Elwyn Johnston, J.R. Campbell, Mitchell Holz, Secretary Miller, Lyle Archer, Robert Bergman, Kenneth Hurst, Larry Emig, and Franklin Heck.

Seitz

Continued from page 3

projects and administration of the local portion of the National Bridge Inspection Program.

Prior to joining Local Projects, Seitz spent 15 years in Design, including 13 years as a Squad Leader managing the design of projects on the state highway system. Before coming to KDOT, Seitz worked two years at Black and Veatch Engineers and Architects.

His professional career began as a teacher where he taught Industrial Arts for six years at Midway High School and Rossville High School.

“I enjoyed teaching, but I was ready to pursue different challenges and the market was good for engineers,” said Seitz. “Teaching was valuable experience and I gained a lot of skills in communication that has helped me deal with issues in my job today.”

The main responsibility for Local Projects is managing the county and city portion of KDOT’s improvement program for roads, streets and bridges. Seitz said the Bureau also provides technical support to local governments in all 105 counties and serves as an advocate for their concerns at the state level.

Seitz holds a Bachelor of Science in Civil Engineering from Kansas State (1984), a Bachelor of Science in Education from Emporia State (1975) and a Master of Science from Pittsburg State (1978).

“The best move I made was coming to work for KDOT as an engineer,” said Seitz. “The agency has a lot of good people that are dedicated to their jobs. It’s a family atmosphere that makes working here enjoyable.”

Seitz is married and his wife, Rhonda, is an agency employee in Fiscal Services where she serves as an Accounting Operations Manager. The couple lives in St. Marys and they have four adult sons – Robin, Ryan, David and Steven.

Seitz succeeds Larry Emig, who recently retired after a 40-year career at KDOT.
the Bureau of Planning and Research for five years.

During this time, Emig, retirees Vern Walrafen and Bill Watts along with KDOT employees Terry Heidner, David Comstock, and Neil Rusch began development of the Control Section Analysis System (CANSYS) the first computer record keeping system for the highways and bridges, which is now the data base for the State Highway System. Then in 1970, a federal requirement mandated all states to do a functional classification and needs study of all the routes.

“We went through the highway strip maps and coded information on the data forms which then got read into a computer program,” Emig said. “This is the first time a strip map had ever been computerized.”

In 1971, Emig was promoted to Program Engineer in the Department of Secondary Roads (now Local Projects). Working with local governments on plans and funding to help them let their projects to construction is a highlight in his career.

“Through the years, you really got to know the county and city officials very well, and they would call upon you and we worked to solve their problems together,” he said.

To address funding concerns at KDOT in the 1980s, the responsibility for selecting consultants to do the inspecting of city and county projects was given to the local governments. A program was developed to help locals with the process.

“Helping to get that set up was monumental and took a great deal of effort to write the agreements, and the agreements now are essentially the same ones we used back in ’84,” Emig said.

In 1987, Emig was named as the Bureau Chief of Local Projects, where he has served for the past 19 years. During the years he has worked with local governments he estimates that Local Projects/Secondary Roads’ staff have assisted cities and counties let to contract over 3,000 road, street and bridge projects.

Emig also worked on the Local Transportation Assistance Program and the Road Scholar Program. Both these training programs focus on improving efficiency for local governments.

No matter the topic, Emig believes training and communication are the keys to success.

“Training keeps us on the cutting edge of making new things happen,” he said. “Training was important 40 years ago and it’s important now.”

Put the Brakes on Fatalities

Several years ago, Emig had a dream of a day with no traffic fatalities across the country. While he recognizes this is an ambitious dream, he worked to begin a national transportation safety program known as Put the Brakes on Fatalities Day to help improve safety.

Larry Emig is the founding father of the national transportation safety campaign Put the Brakes on Fatalities Day, which is Oct. 10 each year. It focuses on overall safety whether traveling in a vehicle, on a bike or as a pedestrian.

“People from Kansas and across the country have gotten involved and are serious about reducing fatalities on our highways,” Emig said. “This program works in conjunction with other safety programs because it isn’t just one thing that’s going to reduce fatalities. We need to focus all year long on buckling up seat belts, driving sober and slowing down.”

During Emig’s career with KDOT he has participated in numerous state and national professional and civic organizations receiving numerous awards.

After 40 years at KDOT, Emig retired on Sept. 21. Now he’s going to learn to relax with his wife, Jean Ann, while traveling to visit their three children.

“I’m going to miss working at KDOT, but I’m really looking forward to not having to go to meetings,” he said.
Rommel appointed to State Employee Health Care Commission

Charlotte Rommel, Human Resource Professional II at Chanute, has been appointed to the State Employee Health Care Commission by Governor Kathleen Sebelius.

Rommel, Thayer, has 20 years of experience in several human resource functions, such as personnel, payroll and supervisory training. She has worked in a variety of fields, including banking, education, and private industry, as well as county and state government. She is also president of Professional Communications Services, which provides human resources consulting for small business owners.

“I was honored just to be nominated, and pleasantly surprised to be selected to fill this position,” said Rommel. “Because of my work in the field of human resources, I have been exposed to the opinions and concerns of individuals at all levels, from consumers to administrators. I am excited about sharing my experience and hope to play an important role as a part of a team effort to help the Health Care Commission to continue to make improvements to the plans and services we provide.”

The State Employee Health Care Commission oversees the administration of the state health care benefits program. The commission negotiates and enters into contracts with qualified insurers, health maintenance organizations and other contracting parties.

Rommel will serve at the pleasure of the Governor. She replaces Sharon Bolyard, who resigned from the board earlier this year when she retired from state service. – S.W.

DID YOU KNOW?

♦ Did you know you can duplicate a slide in PowerPoint and save yourself a lot of formatting time? After a slide with the general formatting desired is done, go to the left pane of PowerPoint and select the Slides Tab (if not already selected), click on a slide to duplicate and select “Insert” – “Duplicate Slide.” Your new duplicate slide will appear underneath your selected slide.

♦ Did you know you can access your Employee File from the KDOT Web? The KDOT Intranet provides a very quick method of looking up employee official information, medical files and more. Go to kdotweb.ksdot.org and click on Employee Info. This tip is from the KDOT Help Desk.

Enroll by e-mail kctc@ksdot.org or call Ingrid Vandervort 785-296-8993. Questions are welcome! Supervisor’s approval to enroll is necessary.
Interstate panel discussion and other events took place in Abilene at the Dwight D. Eisenhower Presidential Library and Museum. Kansas Speedway hosted a media event with many speakers focusing on the future of transportation. The Kansas Turnpike Authority and numerous other groups worked together with KDOT to plan and staff the activities.

“All these events garnered a lot of positive attention from media across the state and provided an excellent opportunity to not only recognize our successful past, but also look toward the future,” Lorenz said.

KDOT members of the team include:

**District Two** - Jim Adee, Scott Allen, Brad Anderson, Duane Bender, Clarence Berry, David Choitz, Kenny Cohen, Steve Cox, Pete Donley, Sara Donley, Don Drickey, John Fleming, Clint Frederiksen, Tim Frederiksen, Robert Gladney, Larry Goddard, David Greiser, Paul Harris, Wayne Heller, Dale Hershberger, Steve Keim, Kevin Kennedy, Matt Lee, Garold Macoubrerie, Richard Martinitz, Mark Meier, Bob Nienke, Tom Nold, Shawn Ploutz, Roger Podlina, Craig Rose, Chad Rutter, Steve Schlagel, Steve Schmidt, Ken Shivers, Max Smith, Pat Tovar, Corey Trumpp, Don Urbanek, Mack Villalpando, Mike Vincent, Lillian Vogan, Flint Warta, Randy West, Carl Wolf, Dave Woods.

---

**Welcome new KDOT employees!**

**Headquarters**
- Lea Ann Curtis, Public Service Executive II, Chief Counsel
- Dwight Garman, Program Consultant I, Chief Counsel
- James Haugh, Systems Software Analyst II, Computer Services
- William Kollin, Administrative Specialist, Fiscal Services

**District One – Northeast**
- Barbara Anderson, Office Assistant, Wamego
- Chris Davidson, Engineering Associate I, Topeka
- Clifford Jones, Equipment Operator Specialist, Osage City

**District Two – Northcentral**
- Richard Hinderliter, Engineering Technician Associate, Salina

**District Five – Southcentral**
- Bambi Anderson, Office Assistant, Wichita
- Jack Garven, Geology Trainee, El Dorado
- Eva Hofflinger, Senior Administrative Assistant, Hutchinson

**District Six – Southwest**
- Wanda Desselle-Robichaux, Administrative Assistant, Ulysses
- Tamara Venturi, Administrative Assistant, Garden City

The Bureau of Personnel Services supplies information for new hires to Translines.
The new signs were installed after the dedication. The eastbound sign on US-24 is located north of Manhattan just to the north of the entrance to the Tuttle Creek Visitor’s Center. The northbound sign on K-177 is located just north of the Geary/Riley county line south of Manhattan. The signs read “Coach Bill Snyder Highway.”

A public service spot for KDOT’s “You drink. You drive. You lose.” program has received special recognition from the Greater Kansas City Public Relations Society of America.

The spot, created for the Bureau of Traffic Safety, took home top honors in the category of programs or projects completed for not-for-profit organizations. Corporate Communications Group in Kansas City was the producer.

The spot begins with a normal size picture of a little girl jumping rope with children’s music playing in the background. An upright liquor bottle then appears next to the girl and ends up on its side. You hear a cork open and a car comes out of the bottle. The car heads toward the girl and she continues to get smaller before being struck. The spot then breaks away to the tagline “You drink. You Drive. You Lose.”

“Verizon Wireless Amphitheater in Bonner Springs was the initial venue for the spot and we were able to reach large, captive audiences at events where alcohol is served,” said Pete Bodyk, Chief of Traffic Safety. “The spot was prominently displayed on the Jumbotron before concerts started and between acts.”

The spot is also being played on TV outlets across the state through September to coincide with an aggressive nationwide campaign cracking down on impaired drivers.

The “You Drink. You Drive. You Lose.” crackdown is a comprehensive impaired driving prevention program that focuses on combining high-visibility enforcement with heightened public awareness. Last year, there were almost 18,000 arrests in Kansas for impaired driving.

Bodyk said there were 93 alcohol-related fatalities on Kansas roadways in 2005 – 22 percent of all fatalities.

This is the second straight year that a KDOT spot has been honored by the Kansas City Public Relations Society of America. Last year the agency was honored for its “Click it or Ticket” safety belt campaign. – S.W.
Fun Facts and Trivia

Do you know?

1. How many roads were on the first Michigan road map, published in 1862?

2. Approximately how many freight railroads operate today in Canada, Mexico, and the U.S.?

3. About 70 percent of what produced in the U.S. moves by train?

4. How many gallons of gas are sold each minute in California?

5. What was the average cost for a gallon of gas in 1995?

6. The United States uses how many gallons of gas each day?

7. What mode of travel has increased at a faster rate than highway travel since 1995?

Plugging the money gap
How will transportation agencies fill a projected money gap in maintaining and building roads? Here's what some states are contemplating or already implementing:

• South Carolina has petitioned the federal government to turn part of I-95 into a toll road.
• Oregon is considering elimination of the state gas tax and replacing it with toll roads with a use charge per mile.
• Atlanta may copy a European model of leasing roads to companies that will maintain them and charge tolls.
• Denver is making extra money by charging tolls for high-speed, limited access lanes on I-25.
• Illinois is discussing the leasing of some or all of the 274-mile state tollway.

Better Roads, September 2006

Texas tops in highway contracts
Texas had the highest value of highway contract awards for the first half of 2006. Contracts awarded in the Lone Star State through June totaled $2.2 billion. Following Texas was California at $1.8 billion; Florida, $1.2 billion; Pennsylvania, $1.05 billion; and Illinois, $905 million.

Better Roads, September 2006

It’s easy being green
Motorists will soon be seeing MoDOT field employees in new high visibility green t-shirts instead of vests in some areas. These new threads are retro-reflective and meet federal safety criteria. Employees like the visibility, comfort and overall safety aspect of the new shirts.

MoDot Express Lane, Sept. 1, 2006

North Dakota State No. 1
A team of civil engineering students from North Dakota State University has won the annual National Steel Bridge Competition for the fourth time in the event’s 15-year history. NDSU is the only school to win the competition more than once.

The 45 competing teams were required to construct a scale-model bridge that could carry a load of at least 2,500 pounds. The bridges were judged in six categories: construction speed, aesthetics, economy, lightness, stiffness and efficiency.

PublicWorks, August 2006

Mother Nature’s wrath
A California company that provides information on healthy living and sustainable cities studied the nation’s 50 largest cities for their vulnerability to natural disasters. The company, Risk Management Solutions, SustainLane, came up with the following lists:

Most at risk
1. Miami
2. New Orleans
3. Oakland, Calif.
4. San Francisco
5. Honolulu

Least at risk
1. Mesa, Ariz., and Milwaukee
2. Cleveland
3. El Paso, Texas
4. Phoenix
5. Tucson, Ariz.

American City and County, August 2006

USDOT designation to NU
The Mid-America Transportation Center (MATC) at the University of Nebraska has been designated the Region VII University Transportation Center by the U.S. Department of Transportation’s Research and Innovative Technology Administration. Under provisions of the federal transportation act, SAFETEA-LU, the new center is authorized to receive $2 million in FY 2007-08 and $2.225 million in FY 2009.

The UTC program has a mission “to advance U.S. technology and expertise in the many disciplines comprising transportation through the mechanisms of education, research and technology transfer at university-based centers of excellence.”
Flagger

Continued from page 4

will look up and know they’re coming.”

Another close call came near Leoti, in Wichita County. “We had our work zone set up and had traffic stopped. A semi came up and the sheriff clocked him at 70 (miles per hour) approaching the work zone. He passed the light trailer, ‘Road Work Ahead’ and ‘One Lane Ahead’ signs before the sheriff got him stopped—maybe 3/10 of a mile from the flagger.”

Fortunately, those who ignore the warning signs are in the minority. “Most people are courteous,” Graham says, “but I have been given the finger and cursed at as people went by.”

Graham adds that being on both sides of that stop paddle has changed his own driving habits.

“If I come upon a work zone I start slowing down right away. Before (working for KDOT) I probably never did that. Now I know what it’s like to be standing on the road and have somebody blow by you at 55 miles per hour.”

You’re hot, tired and thirsty. It’s already been a long day and you’re standing alone on a highway with a vehicle speeding down the road toward you and your co-workers behind you. They’re focused on the task because they’ve got warning signs and you to stop the traffic. All you’ve got is that sign paddle.

“You’ve got to be seen,” Graham repeats. “You’re looking out for the other employees. They’re depending on you to keep the traffic off of them.”

Deaths

Condolences to the family and friends of a former KDOT employee who recently passed away. Fred Marstall, 49, died Sept. 11 at Topeka. Marstall worked for KDOT 20 years as a Management Systems Analysis before retiring in 2001.

Marstall is survived by his wife, Tammy, two sons, one daughter, two sisters and five brothers. Memorial contributions may be made to the Fred Marstall Memorial Fund to be designated at a later date and sent in care of Piper Funeral Home, 714 Maple, St Marys, 66536.

Retirees

The following employees will officially retire from KDOT on Oct. 1.

Headquarters
Safwat W. Bishara, Research Chemist in Materials and Research – 20 years of state service
James A. Craig, Engineering Technician Specialist in Design - 30 years of state service
Sandra E. Greenwell, Civil Rights Administrator – 20 years of state service
Richard L. Keefover, Engineering Associate in Construction and Maintenance – 29½ years of state service
Stephen J. Malone, Equipment Operator at Blaine – 34 years of state service

District Three
Lyle A. Archer, Public Services Administrator I at Norton – 40 years of state service
Tommy A. Baker, Equipment Operator at Stockton – 23 years of state service

District Four
Roy L. Howell, Equipment Operator Senior at Chanute – 38 years of state service
