Put the Brakes on Fatalities

Ditch the Distractions

Distracted driving diverts a driver’s attention and endangers the safety of the passengers and bystanders as well as the driver. Distractions include:

- Using a cell phone or smartphone
- Watching a video/adjusting a radio
- Reading, including maps
- Using a navigation system
- Eating and drinking
- Talking to passengers
- Grooming
- Texting

Is a text worth your life?

Just Drive

Put the Brakes on Fatalities Day

Sponsored by local, state and national organizations to improve transportation safety

Always Make Safety Your Top Priority

- Wear protective gear. Seat belts in vehicles and helmets for cyclists greatly reduce injuries or deaths.
- Drive courteously and defensively.
- Don’t speed or drive aggressively or while impaired.
- Know the rules of the road, and obey all signs and signals.

More than 53% of all adult cell phone owners have been on the giving or receiving end of a distracted walking encounter.

Each day in the U.S., more than 8 people are killed and 1,161 are injured in crashes reported to involve a distracted driver, according to NHTSA.

Five seconds is the average time your eyes are off the road while texting. When traveling at 55 mph, that’s enough time to cover the length of a football field.
