

BYE, BYE BLIND SPOTS

Adjust your driver's side mirror,
by resting your head against
the driver's side window and
turning the mirror so you see
just the left side of your car.

Next, move to the center of the seat
and adjust the passenger's
side mirror, until you can see
just the right side of your car.

Now, when you get behind
the wheel—cars behind you will be
visible in your inside mirror,
but as soon as they disappear
from your inside mirror, you should
be able to see them in your
outside mirrors. Like magic—
no more blind spots.

That's...
